Melba PEACH

No. 6-10. Melba—on our front cover for the third time, is our greatest find in an all-purpose, large, delicious HONEY-HYBRID Peach. Adapted from coast to coast. Frost-resistant—April 5, 1950, our Melba orchard took 10 degrees below freezing while in full bloom and still produced a bumper crop. Our special Melba (visitors) orchard starts ripening early in June and lasts most of July. No other Peach ripens over such a long period. Never has a fruit variety received such unanimous acclaim as Melba. Not one person has failed to say, "That's the best Peach I ever tasted." Healthiest grower of all and disease-resistant. Available this year in jumbo, bearing trees. Labeled with TWO RED stripes.

PRICE:

2 to 3 ft. trees	\$0.75 each
3 to 5 ft. trees	1.00 each
5 to 7 ft. jumbo trees	1.50 each

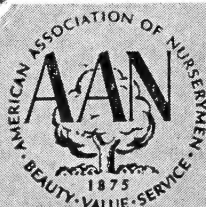

Texaberta

The Nation's Perfect Peach

No. 6-3. A perfect FREESTONE that ripens about July 10th. This outstanding Peach has not missed a crop at Belton, Texas, since it was originated 23 years ago. Combine the best qualities of all Peaches, add a few and you have Texaberta. It is really a Peach of a Peach. FROST-RESISTANT. It has bright red, juicy flesh around the small seed; forming into deep tender yellow toward the tough thin skin. Delicious! Well, you just don't know what good eating is until you have had the juice of a Texaberta running down your chin after a big bite. It produces in mild climates where Elberta is a failure, bears very young and is an excellent shipper. Commands top prices at all markets. We have been very careful to preserve the pure strain in our bearing orchard. Sold only by Wolfe. Labeled with a RED stripe.

PRICES

2 to 3 ft. trees	\$0.75 each
3 to 5 ft. trees	1.00 each
5 to 7 ft. jumbo	1.50 each

COMBINATION HOME ORCHARD

16 fruit trees—Peaches, Plums, Apricots, Pears and Apples—ripening all through the season for an ideal combination HOME ORCHARD. We have gone through our list of varieties and selected those best suited to your soil and climate—taking into consideration cross-pollination for heavy production of first quality fruit. Plant these trees within 20 or 25 feet apart for best results. All these trees are two years old and in the jumbo bearing size. You've never seen such trees as we are now offering. Here's what you get in the size you want: (1) Melba Peach, (1) New Elberta Peach, (2) Elberta Peach, (1) Frankie Peach, (1) Frank Peach, (1) Texaberta Peach, (1) Golden Cluster Apricot, (1) Moorpark Apricot, (1) Holland Apple, (1) Golden Delicious Apple, (1) Douglas Pear, (1) Kieffer Pear, (1) Munson Plum, (1) Sapa Plum Cherry, (1) Burbank Plum.

We Reserve the Right to Substitute in These OFFERS

OFFER No. 1—All 16 trees named above in the 2 to 3 ft. size, \$7.50

OFFER No. 0-2—All 16 trees named above, 3 to 5 ft. size, \$12.40

OFFER No. 0-3—All 16 trees named above, 5-7 ft., jumbo, \$19.50

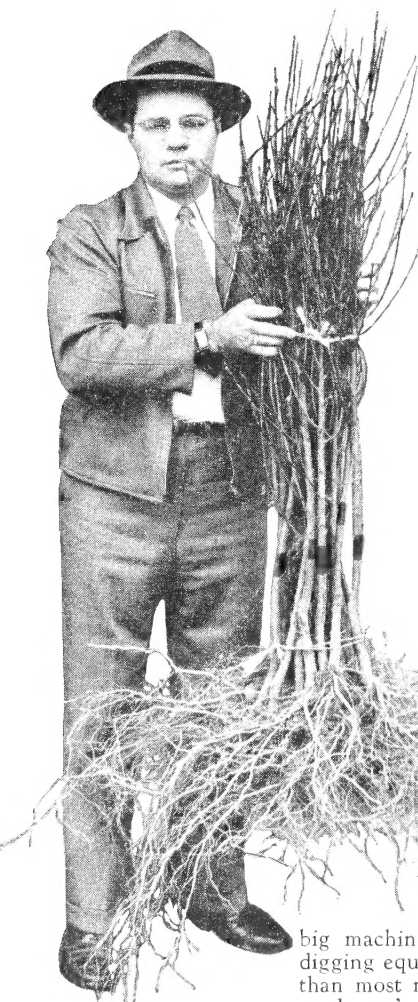

COLOR LABEL

We guarantee Pure-Strain, true-to-name nursery stock. As pictured at left, our trees are labeled with paint before they are dug. The worst mistake a nursery can make is to sell untrue nursery stock. You not only lose the cost of the tree, you lose the cost of planting, cost of care and have some variety that you didn't want. You can depend on our trees. Keep this catalog to identify your trees when they start bearing.

← 3 to 5 ft. size

Heavy Root System

The picture at left shows the heavy root system of Wolfe-Grown Trees, one of the many reasons why our stock bears so quick and so heavily. Our trees are dug with heavy machinery so none of the branch roots are lost. This year, we are digging Pecans and Walnuts with big machinery. Even using expensive digging equipment, our prices are lower than most nurseries and the quality of stock can't be matched.

PLANTING DISTANCES

Give Plants Enough Room

Planting distances between trees depend primarily upon the type of tree, its purpose, the amount of rainfall, and the fertility of the soil. For example: trees planted in East Texas and the Southeastern States may be planted closer together than those of West Texas and New Mexico, because of the greater rainfall in the Eastern section.

To make allowance for these factors, the following distances are recommended:

Apples, Pears, and Apricots	30 to 40 ft. apart
Cherries, Plums, and Cherry-Plums	20 to 25 ft. apart
Figs	15 to 25 ft. apart
Grapes	10 to 16 ft. apart
Peaches and Persimmons	20 to 30 ft. apart
Pecans and Walnuts	40 to 60 ft. apart
Shade Trees—large growers: Chinese Elm and Sycamore	30 to 50 ft. apart
Medium to small growers: Mimosa, Red- bud, and Weeping Willow	20 to 40 ft. apart
These trees may be spaced closer together when planted in a single row or in yards.	
Dew-Black berries	Plant 3 ft. apart in rows 6 ft. apart
Rosberries and Thornless Boysenberries	Plant 4 ft. apart in rows 6 ft. apart

Robin Peach

FIRST IN THE SPRING

No. 6-7 Robin The Early High-Profit Peach

This is the most valuable and extraordinary of all the new peach varieties because it is the first good Peach of the season, ripening weeks before any other good early Peach. That fact alone puts Robin in a class by itself. It is a beautiful red-cheeked, white-fleshed, medium size fruit, semi-freestone, so richly colored and handsome that it will make your mouth water just to look at it. Deliciously flavored, the fruit is firm and smooth, almost fuzzless, round in shape. It keeps well after picking. In addition to ripening the first good Peaches of the season, Robin trees bear enormous crops. They grow rapidly and bear fruit amazingly soon—sometimes the first year after planting.

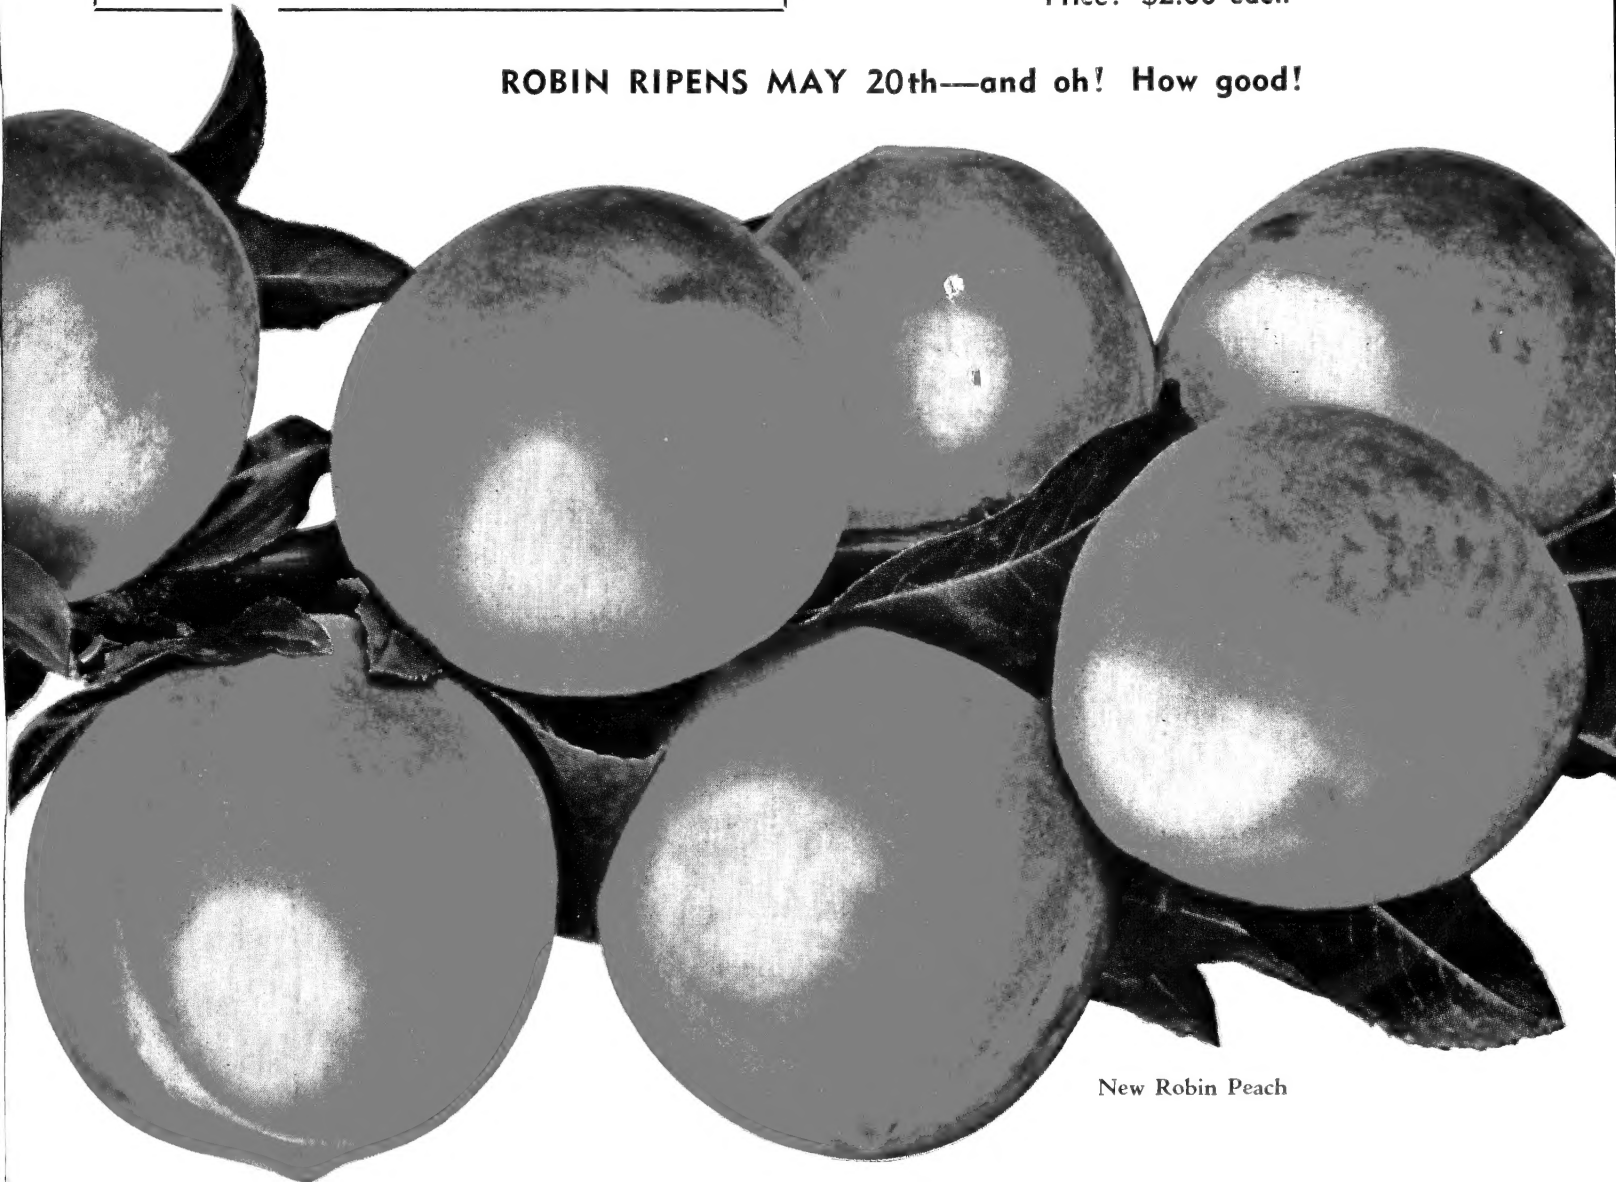

If you and your family want to enjoy the first good Peaches of the season, then you will have to include Robin in your home garden planting.

FROST-RESISTANT! Robin, in full bloom, withstood 10 degrees below freezing April 5th, 1950, and still produced a full crop of number one Peaches. **It's a sure bet.**

Hale-Haven

Jumbo Frost-Resistant Varieties Are
Our Specialty

No. 6-9 HALE-HAVEN

Freestone that ripens June 25th. Cross between South Haven and J. H. Hale. Large, beautifully colored, yellow fleshed Peach. Splendid shipper. Heavy producer and brings top prices. It is one of the finest canning Peaches grown. Every Peach is a big handful of delicious, tempting goodness. It colors long before ripe and is perfect self-fertile, extremely hardy, prolific and a good pollinator for other Peaches. Label—2 BLUE stripes.

No. 6-1 *Indian Chief Peach*

Three Fill a Half-Gallon Jar

**Stay With Wolfe and Grow Peaches That
REALLY MAKE A HANDFUL**

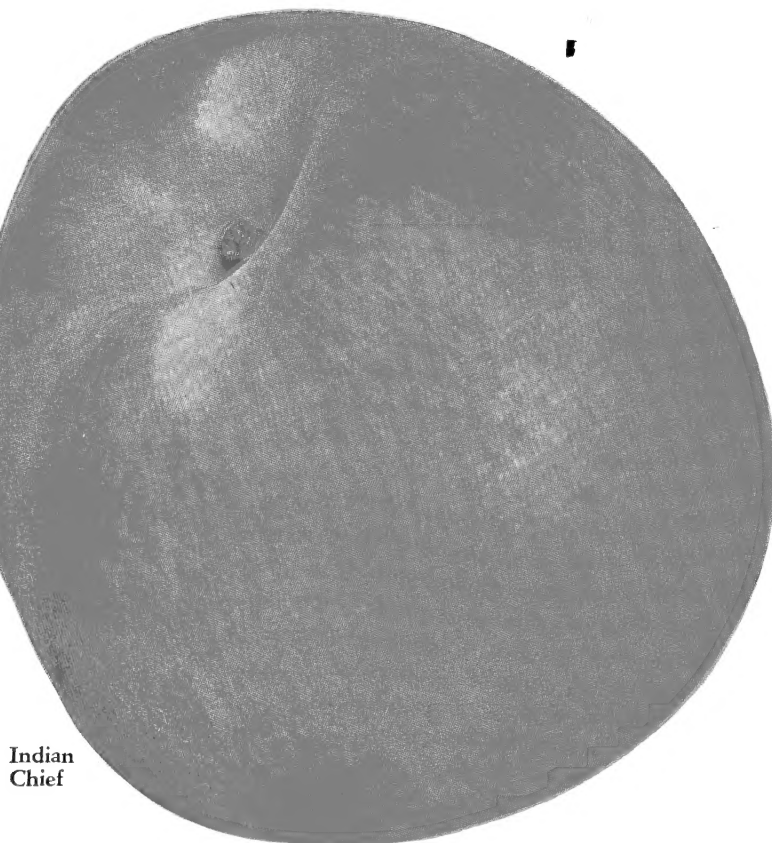

A cling that ripens about July 20th. Can you imagine an Indian Peach so large that three will fill a half-gallon jar. Some so large that they won't even go in a half-gallon jar. We offer a handsome reward for a better and bigger Indian Cling Peach than ours. Mrs. Wolfe says it is the finest pickling Peach in the land. A 24-year-old tree here in Stephenville is still bearing the finest red-fleshed, red-skinned Peaches I have ever seen. Our buds are taken from proven orchard bearing trees and paint labeled so that we can absolutely guarantee pure-strain, true-to-label varieties. Indian Chief is labeled ORANGE. See prices above.

**While Ordinary Nursery
Trees are Growing —

BEARING**

Frost-Resistant Peaches

We specialize in Frost-Resistant Peach varieties. A Peach tree without a crop is a dead expense. Look at the record of Frank, Frankie, Texaberta, Melba, Jubilee, New Elberta, and our special Elberta. A CROP EVERY YEAR. They bloom late in the season and bloom over a long period of time. One Wolfe heavy bearing tree is worth ten that lose two and three crops out of five.

Indian Chief

Three GREAT PEACHES

*Pure Strain-True to Label
Varieties that Bear Young
and Heavily!*

No. 6-8 GIANT HALE

Freestone that ripens about July 15th. Can you imagine a Peach so huge that it will measure one foot in circumference and weigh near one pound? Some of Wolfe's Giant Hale Peaches are that big. It is a grand Champion in all the shows. The giant dark red Hale demands instant attention at all markets and sells like hot cakes at high prices. Be sure to plant another variety with Giant Hale for a pollinator. Hale-Haven, Texaberta, New Elberta and Elberta are good varieties to plant with Hale. Labeled YELLOW.

No. 6-5 NEW GOLDEN JUBILEE

Yellow freestone that ripens about June 15th. The first yellow freestone to ripen. It is ready for market about five days before regular Jubilee and is a much better Peach. It doesn't have the soft tip like regular Golden Jubilee. It is similar to Texaberta in size, color, flavor and shipping qualities. This big, sweet, yellow freestone ripens just after Early Wheeler and is extra frost-resistant. The large, delicious Peaches hang on the tree remarkably well after they are ripe and are very resistant to brown rot. A winner for either home or commercial planting. NEW Golden Jubilee is labeled with 2 YELLOW stripes.

GIANT HALE

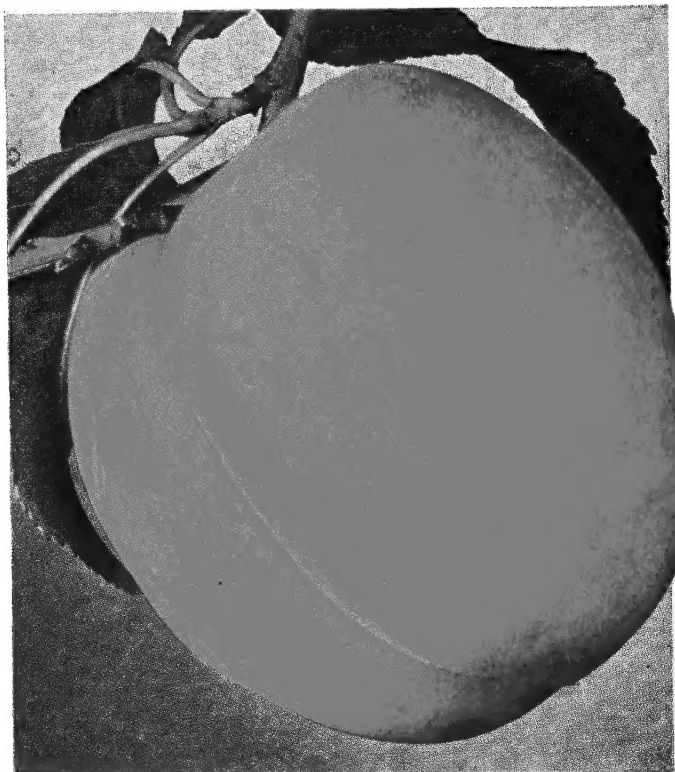

Picked From
Wolfe's Bearing
Orchard

No. 6-2 NEW ELBERTA

Is a yellow freestone, that ripens about June 20th. The first of its class to reach the market. Commercial growers and home orchardists have welcomed New Elberta as a precious gift to early harvesting. It frequently bears one year after planting and proves that "Money DOES Grow on Trees." Heavy bearing orchards of New Elberta are a beautiful sight of scarlet-red fruit. The meat is very fine and the seed is small. Wolfe's New Elberta usually bears when common varieties fail. For pure strain varieties that are paint labeled before they are dug, depend on Wolfe. Labeled with one PINK stripe.

Holds WORLD'S PRODUCTION Record

Frost-resistant! Frank, along with Texaberta, Melba, Frankie, New Elberta and Robin, took 10 degrees below freezing in full bloom and still produced a full crop of top-quality Peaches.

Frank No. 6-4. The RECORD PRODUCER. Now 46 years without missing a crop at Mexia, Texas. A real frost-resistant Peach. Three-year-old Frank here at Stephenville, Texas, set a new production record with 10 bushels of large, firm, juicy, yellow cling Peaches that ripened August 10. So sweet that it can be canned without sugar. This tasty Peach has a smooth, firm flesh that pleases the most exacting taste. Growers are making from \$300.00 to \$500.00 per acre—that proves MONEY DOES GROW ON TREES! Farm and Ranch Magazine says: "The most outstanding Peach produced in the Southwest." For the genuine Frank, get it at Wolfe's. Labeled with one WHITE stripe.

PRICES: 2 to 3 ft. trees \$0.55 each
3 to 5 ft. trees .90 each
5 to 7 ft. jumbo 1.30 each

Frankie No. 6-6. A true sister Peach to the famous Frank that ripens from August 15 to September. This large, beautiful yellow freestone has all the qualities of Frank with one exception. Frank is a bit sweeter. Frankie is a heavy producer even during years of late frost and dry years. It has a color and flavor that sells; rich yellow with bright red, sun-kissed cheeks. Frankie and Frank make an ideal pair for home and commercial planting. R. B. Alexander, of Weatherford, Texas, said: "If I were a young man, I would plant 1000 acres of Frankie. It's a sure thing." Truckers who come to our orchards say: "Frankie is one of our best sellers and shippers."

PRICES 2 to 3 ft. trees \$0.55 each
3 to 5 ft. trees .90 each
5 to 7 ft. jumbo 1.30 each

Labeled with a BLUE stripe.

CULTURE: Care of Plants On Arrival

All plants should be unpacked immediately upon receipt from our nursery. Check carefully to see that the varieties and sizes you ordered were shipped, or that proper substitutions were made providing we were authorized to make them. Be sure to keep the original copy of your order blank which serves as a packing slip and was returned with your order. We will need it in case of adjustment.

You should make a special effort to do the planting when the nursery stock is received. If conditions are unfavor-

PURE-STRAIN, TRUE-TO-LABEL FRUIT TREES

Tree Ripe Peaches Quick

for Your Table from Wolfe Trees

No. 6-11 ELBERTA

Would you believe that there are over 100 different kinds of Elbertas being sold by nurseries? Very few have the original pure strain that gained world-wide fame for its size, color, flavor and bearing habits. We have taken great care to see that the buds we use come from proven, heavy bearing orchard trees and that they are paint labeled in the field to insure true-to-name variety. Our true ELBERTA, a huge yellow freestone, ripens about July 10. We own and maintain a Proven Bearing Orchard for bud-wood supply and you are cordially invited to visit us during the bearing season. We'll feed you all the tree-ripe Peaches you can eat. Elberta is labeled GREEN.

PRICES		
2 to 3 ft.	\$0.55	
3 to 5 ft.	.90	
5 to 7 ft.	\$1.30	

able for planting, heel the plants in the ground in a well drained location. Dig a trench that is deep and wide enough to hold the roots. Remove the plants from the package, cut all strings, and place their root system in the trench.

To prevent the roots from drying out, work the soil thoroughly in and around the roots. Regardless of whether the soil is wet or dry, pour sufficient water in the trench to pack the soil closer to the roots. This will drive out air pockets, keep the roots moist, and in a good living condition.

A New NECTARINE

No. 6-12 PIONEER

The Nectarine is such a delicious fruit it has always been a source of disappointment that there has been no Nectarine variety which was dependable in this area. Only now have we succeeded in getting a Nectarine that has stood the test.

These big, bright red and yellow fruits are unbelievably good, and so good looking that you will keep a bowl of them on the table just for ornament. (We guarantee they won't stay in the bowl long, they taste too good.) You'll not have to hope for a crop—you'll get it every year without fail. Add to all this the fact that the big spring blooms have such a lovely clear pink color that it is almost as ornamental as the finest flowering Peach—after all this, does it sound as if you could afford to be without it? Ripens July. Plant Pat. No. 787.

No. 9-6

"Howard's Miracle"

(Patented)

THE MOST SENSATIONAL FRUIT OF A DECADE

THE INTRODUCTION of the "Miracle Plum" marks an epoch in the advance of fine fruits for the table. The tantalizing and delicious flavor, the great size, firm amber flesh, combined with a delightful color, place the "Miracle Plum" in a class by itself.

Invariably, after tasting the "Miracle Plum," comes the exclamation: "This fruit is truly a miracle. It is something out of this world."

Here are some facts about the "Miracle Plum": Extraordinarily large size fruit, average diameter $2\frac{1}{2}$ to $2\frac{3}{4}$ inches. An astounding surprise to the palate, flavor not unlike Nectarine, Peach and

Plum mixed; skin thin and unnoticeable when eating fruit, miniature stone, meat Nectarine-like in quality. Keeping qualities excellent, delicious in preserves, fruit ripens over long period during July and August. Exceedingly fast growing and quick bearing tree, which will bear fruit second year after planting. Beautiful ornamental tree of medium size, foliage persistent, in autumn richly tinted not unlike the leaves of a Maple. Can be grown in a small garden.

Now as to its hardiness, the demand for this new fruit from states where temperatures are not too severe, is so insistent that we cannot withhold distribution until final tests for hardiness have been completed. However, we are offering it for such a modest price that anyone living in the coldest sections of this country desiring it, can well afford to take a chance and be the first to enjoy this wonderful new Plum.

1-Yr. Trees, Labeled Blue Over Orange

Price: \$2.00 Each

YOU'VE NEVER TASTED PLUMS LIKE THESE!

The great size, the new delicious flavor. (Is it Nectarine? Is it Peach? Is it Plum?) The firm amber flesh make it the most exciting fruit grown today. Plant one or more of these exceedingly fast-growing, quick-bearing trees and harvest fruit the second year. Bears through July and August.

Delicious Apricots for HOME USE

A "MUST" FOR EVERY HOME ORCHARD

No. 2-1 SUPERB

For many years we have been searching for a large, fine flavored Apricot which could be counted upon to bear good crops every year in the South. Our search has been rewarded with Superb. Thoroughly adapted to our climate and soils, it produces big, round, orange-yellow fruits, with a delightful rosy blush. The full-flavored, tender flesh melts away as you eat them right off the tree. An ideal home orchard Apricot that ripens the first week in June. See prices below. Labeled with a GREEN stripe over RED.

No. 2-3 MOORPARK

The most popular commercial Apricot grown and adapted to most all sections. It is rather a large Apricot with tender, sweet orange flesh. It separates easily from the small seed and is a grand variety for eating fresh, canning or drying. Hangs on the tree remarkably well. Moorpark is labeled with a GREEN stripe over a BLUE.

No. 2-2 GOLDEN CLUSTER

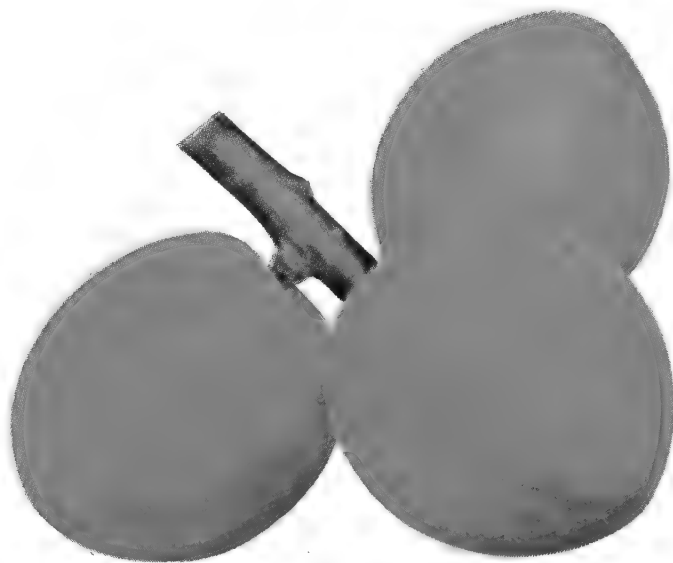

A medium to small prolific Apricot with a smooth light orange-yellow skin. The delicious yellow flesh is firm but juicy. Not dry like some common varieties of Apricots. Apricots should be cultivated very shallow as the feeder roots are close to the surface. Golden Cluster is labeled with a GREEN stripe over a WHITE stripe.

Allred Plum

Beautiful to See—Delicious to Eat

No. 9-1. This most unusual Plum is another of Wolfe's new varieties resulting from a never ending search for new and finer fruits. Allred looks like a big dark red Cherry and bears showers of sweet, juicy, red meated Plums all over the long limbs. I know of no other fruit that offers such beautiful blossoms in the spring, outstanding red foliage all through the growing season and so much delicious eating. You should see visitors here at the nursery when we take them to the Allred orchard. One man ate so much that I expected to see red juice run out of his ears any minute. He said the Allred Plum was too good to be true. The leaves are RED. The stem and branches are RED. The fruit is RED outside and inside, and the tiny seed is RED. Allred is all red. Labeled with a BLUE stripe over a WHITE stripe.

Allred Tree—All Red

Wolfe Plums

for
Eating Fresh—Jellies—Plum Butter
Jams—Canning and Market Profit

No. 9-2 BURBANK PLUM

One of the finest eating Plums that ripens about June 25th. It is a large, purplish red Plum with deep yellow, delicious flesh. A very prolific variety that was created by, and named for, a great man. Burbank is an excellent commercial Plum, and sells in the fancy fruit class. It is labeled with a BLUE stripe over a GREEN stripe.

No. 9-3 MUNSON PLUM

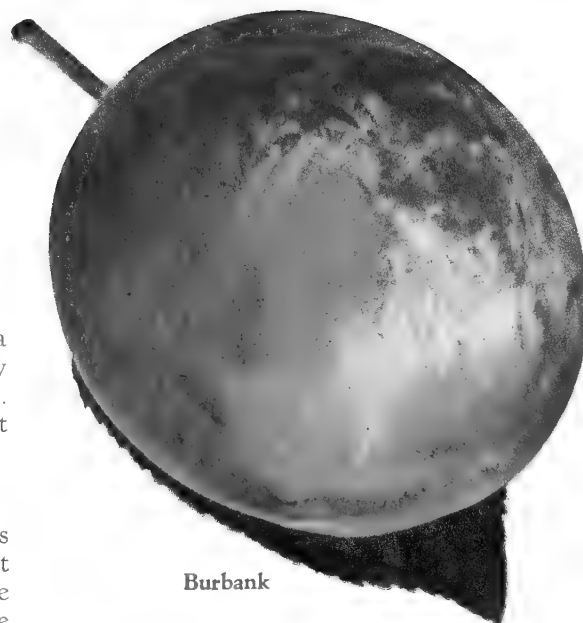

When I first tasted this outstanding Plum, I said it was as sweet as honey, and as yellow as new gold. It is one of the heaviest, earliest producers that I have ever found. Delicious to eat and makes the most beautiful, clear yellow jelly you have ever seen. It should be included in every home orchard planting. Munson is labeled BLUE over YELLOW.

No. 9-4 BRUCE PLUM

The best large red Plum grown in the South. The tree is very healthy, bears very young and produces loads of Plums nearly as large as a hen egg. It ripens early in June, and growers report getting \$8.00 per bushel on the New York market. Other varieties of Plums must be planted with Bruce for pollination. It is the only variety on our list that is not self-fertile. In commercial plantings, we recommend planting one pollinator to twenty Bruce. Bruce is labeled BLUE over RED.

No. 9-5 SAPA PLUM-CHERRY

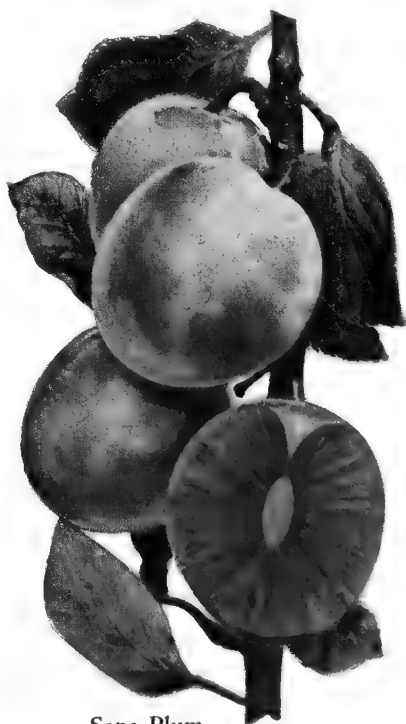

A home orchard would not be complete without at least one Sapa Plum tree. Ripens the last of June and is a tremendous producer. It is medium in size, and has rich, dark purplish red flesh. High sugar content makes it the very best jelly Plum. The heaviest bearing Plum we have. Good pollinator. Labeled BLUE over PINK.

Pears You Pick from Your Own Trees*

No. 7-3 GARBER PEAR

Eat 'em juicy-ripe right off the tree. This beautiful colored and well shaped Pear is suited for just about every need. It is a heavy producer that is a good shipper, good for wrap storage, eating, preserving and a money maker on the commercial market. It ripens in August when good eating Pears are in demand. Garber is labeled PINK over BLUE.

No. 7-1 KIEFFER PEAR

A variety adapted to all sections—including sections where Bartlett is a failure. It is a sure bet for heavy, consistent crops of large, white fleshed Pears. It is a golden yellow Pear that is an extra good cooker and ideal for winter storage. It will keep for a longer time and gets very sweet and mellow after about a month. Kieffer is labeled PINK over RED.

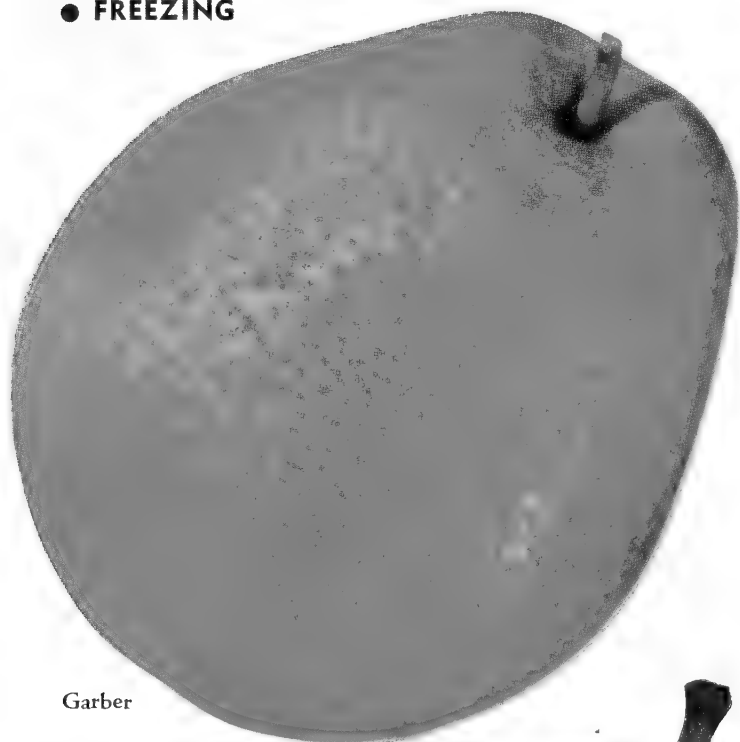

No. 7-2 ORIENT PEAR

A new variety that deserves a place in our Book. Ideal for Southern planting. Being entirely immune to BLIGHT disease puts it in the top class. Fruit measures 3 to 3½ inches in diameter and is of excellent quality. Skin is lemon-yellow and flesh is creamy white and smooth, delicious texture. Tree is a vigorous grower and well-shaped. Ripens late in August. Labeled PINK over WHITE.

Wolfe's Everbearing Fig

Figs the First Year

You can have fresh, big, soft, sweet Figs the first year from Wolfe Everbearing Figs. Easy to plant and easy to grow. I wish you could spread some of the delicious Fig preserves that Mrs. Wolfe makes, on a hot biscuit, with a little butter, and then take a big bite. Good! So good that you'd plant three or four Figs in your back yard. Figs the first year.

No. 4-1 WOLFE'S EVERBEARING FIG (Ramsey)

It bears the first year and ripens big, delicious Figs from July until frost. Bears on new growth. As the actual color picture shows, it is a beautiful Fig and very sweet. \$400.00 an acre was made on this Fig at Dallas, Texas. Labeled PINK over WHITE.

No. 4-2 MAGNOLIA FIG

A large, brownish straw colored Fig that also bears the first year. You can't go wrong planting these two outstanding Figs. Magnolia is labeled PINK over BLUE.

Wolfe Outstanding Douglas Pear

THE SUGAR PEAR THAT BEARS VERY YOUNG

Ever stop to think that the root system of a tree could make any difference in its bearing age, healthy growth, amount of fruit per tree, or the length of its useful life? There is a lot of difference! We use Calleryana Pear understock (root system) which is a native of Northern China. They are a tiny Pear about the size of your thumb. We have tested Calleryana alongside other rootstocks for several years and find it to be superior in every respect. In addition to growing a better, heavier producing tree, Calleryana causes a Pear tree to produce at least two years earlier. Pear trees grown on common understock usually start bearing at 5 or 6 years old. You want the best, we want to sell only the best; that's the reason Wolfe Nursery has gone to so much trouble and expense to secure Calleryana. It is resistant to all known root diseases. Sorry looking root system but the very best. They live—produce!

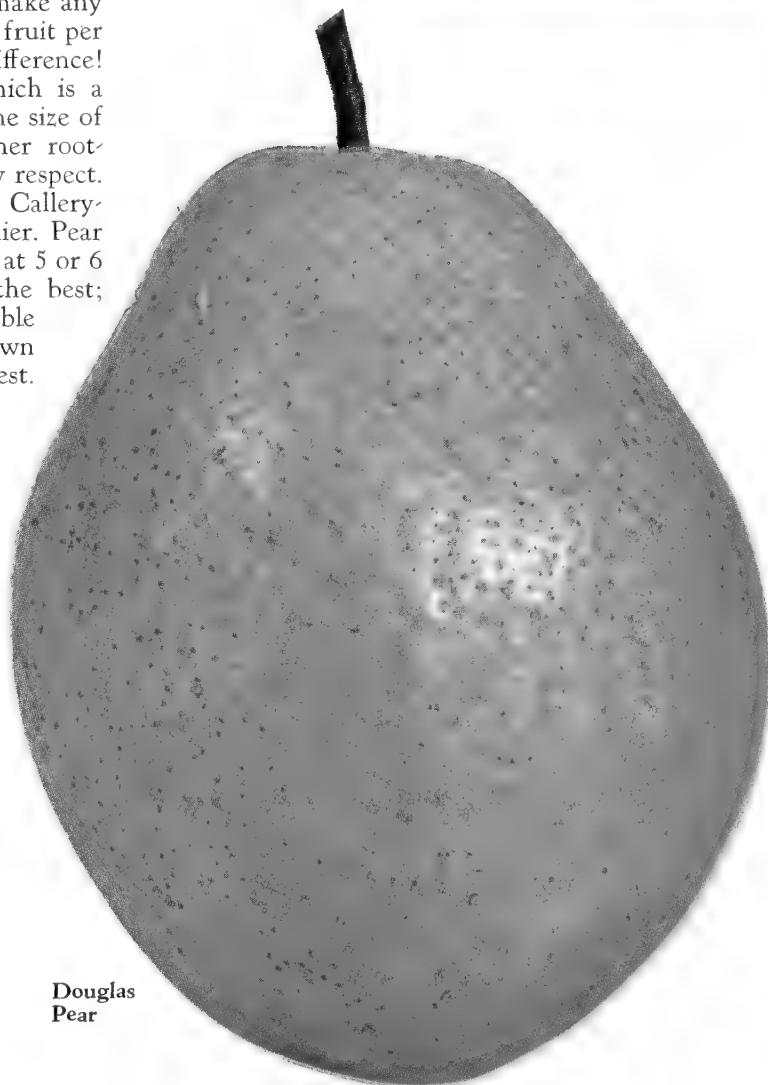

No. 7-4 DOUGLAS PEAR

There are bigger Pears but none will bear as early as Douglas. It ripens about August 15th and is the youngest and heaviest bearing variety that we have to offer. 2- and 3-year-old trees are often loaded with beautiful, yellow Douglas Pears. It is **blight-resistant** and is fast taking the lead as a commercial variety. A few acres of Douglas will put that ringing noise in your pocket. Write for special commercial prices in lots of fifty. Douglas is budded on Calleryana rootstock and you can rest assured that it will be a money maker. Pear trees can be grown 10 feet apart in home orchards but should be planted 20 or more feet apart in commercial orchards. Douglas is labeled with a PINK stripe over a YELLOW stripe.

BEST APPLE AT CHICAGO WORLD'S FAIR
Two-Year Holland Has
Produced First Year
 AFTER PLANTING

Holland Apple!

RIPE JULY 15th

No. 1-1

Mother Nature must have decided to combine all the best qualities of Apples into one when Holland was originated. When I first saw this grand Apple at Weatherford, Texas, I knew it was the Apple that Texas and the great Southwest needed. For many years Holland has proven to be a consistent, heavy producer of huge, dark, strawberry-red, smooth, firm, juicy fleshed Apples. Its delightful flavor more than pleases the most exacting taste.

Being a native Texan, Holland is especially adapted to our climate and soils, but has proved outstanding wherever Apples are grown.

It is a good packer and shipper. I have had them to last over thirty days on my desk. It ripens about July 20th and is on the market before outside Apples are shipped in. It hangs on the tree exceedingly well, giving the commercial grower a long period for harvesting—DOES NOT need a long period for selling.

SELF-FERTILE

Holland makes the perfect Apple for home planting. It is self-fertile and will bear every year. Bears very young—second and third year yields good crops. Six-year-old trees have produced over five bushels that sold for \$4.00 per bushel. Twenty dollars per tree is proof that "Money DOES grow on trees." Labeled ORANGE over RED.

PRICES OF HOLLAND

2-3 ft. trees	\$1.00 each
3-5 ft., branched	1.50 each
5-7 ft. jumbo, 2-yr.	2.00 each

Please limit your order to not more than ten Holland trees

Wolfe's **APPLES** that Produce Heavy Crops in the South

No. 1-4 **DOUBLE RED DELICIOUS**

The old King of red eating Apples that is grown from coast to coast with equal success. By thinning the fruit properly, Double Red will develop into a huge size. Our pure-strain Double Red bears loads of big, sweet, firm Apples, that are a treat to enjoy. Trees you receive from Wolfe Nursery are budded from our own bearing orchards. Store-bought Apples are picked before they are ripe and don't compare with those picked from your own trees. Double Red Delicious is NOT self-fertile and MUST be planted with either Holland, Golden Delicious or King David. Double Red is labeled ORANGE over BLUE.

PRICES

3 to 5 ft. size \$0.90 each

5 to 7 ft. size, 2-yr. 1.30 each

No. 1-2 **GOLDEN DELICIOUS**

By far the outstanding Apple in its class. Self-fertile and an excellent pollinator in the home or commercial orchard. Golden Delicious is a mild, juicy, sweet, crisp, white fleshed Apple with new-gold skin that has a distinctive flavor all its own. It is a richly fragrant and appetizing Apple that belongs in every home planting. Like Holland, Golden Delicious is adapted to a wide territory and bears very young. Golden Delicious is labeled with an ORANGE stripe over a WHITE stripe.

PRICES

3 to 5 ft. size \$0.90 each

5 to 7 ft. size, 2-yr. 1.30 each

No. 1-3 **KING DAVID**

An August Apple that will yield from \$200.00 to \$300.00 per acre. One orchard at Baird, Texas, has produced as much as \$500.00 worth of King David Apples per acre. It also proves that "Money DOES grow on trees." KING DAVID is a medium size, firm, bright red Apple with a tart acid flavor, somewhat similar to the old Winesap—juicy. Very prolific producer and healthy grower. Perfect for Apple pies, cobbler, Apple jelly, jams and Apple butter. Tall all-purpose Apple that is one of the best pollinators. Labeled ORANGE over YELLOW.

PRICES

3 to 5 ft. size \$0.90 each

5 to 7 ft. size, 2-yr. 1.30 each

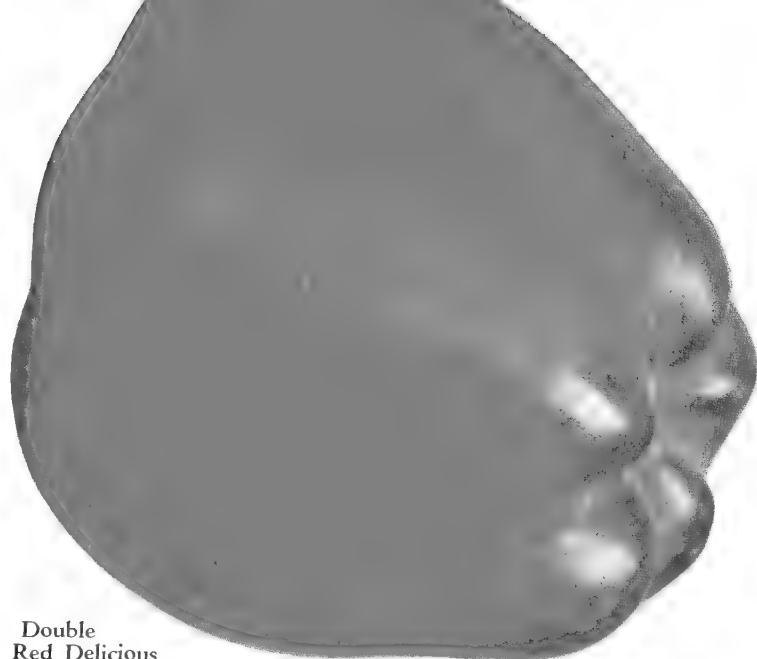

No. 1-5 **TRANSCENDENT**

(Below.) "Most valuable of all red Crabs," because of very heavy production, attractive crimson red color, good size, and unexcelled quality of its jelly, preserves, jams and pickles. Tree is dwarfish. Pink blooms and ruby red fruits make it a fine lawn ornamental. Bore $\frac{1}{2}$ bu. at 2 years.

Sweet and Tart CHERRIES

No. 3-3 EARLY RICHMOND CHERRY

The leading early sour Cherry of the nation. The fruit is bright red, juicy and excellent for pies and Cherry jam. Ripens about June 15th. The tree is a strong, healthy grower, and produces very young. Plant only in altitudes of 600 feet and up or in sections having cold winters. Labeled WHITE over YELLOW.

PRICE—Early Richmond
 2 to 3 ft. size \$0.90 each
 3 to 4 ft. size 1.30 each

No. 3-1 BLACK TARTARIAN

Very large, bright, tender, juicy sweet Cherry with a rich flavor. The tree is remarkably vigorous and an erect grower. It is a heavy bearer of the finest Cherries on the market. Black Tartarian is the first sweet Cherry we have ever offered. We have had so many calls for this popular variety that we felt that it should be listed.

We do not recommend Cherries south of Waco.

Labeled WHITE over RED.
 Ripe in June.

The MEN BEHIND WOLFE NURSERY

ROSS R. WOLFE

Ross R. Wolfe founded Wolfe Nursery in 1920 and devoted his life to the selection and breeding of better fruit and nut varieties. Pioneer in soil building and diversified farming, paying orchard practices and civic improvements. Served as President of Texas Nurserymen, Pecan Growers, Fruit Growers, Chamber of Commerce, Lions Club, and Director of American Association of Nurserymen. His high standards and business ethics are known by the thousands who have continued to be loyal customers. I, Hugh Wolfe, and every member of Wolfe Nursery, pledge strict adherence to the policies and standards of Ross Wolfe. Better nursery stock at reasonable prices, personal attention to your needs, and prompt, friendly service will be our bid for your patronage.

E. E. RISIEN

E. E. Risien received the Gold Medal for his outstanding contribution to horticulture. This grand old man gave many new and valuable varieties to the Pecan world, such as Garner and Western Schley. By Mr. Risien's request, Wolfe Nursery is continuing his breeding work for bigger and better Pecans. Our first successful new cross was harvested two years ago, but it will have to be thoroughly tested before we offer it for sale.

J. W. STUBENRAUCH

Famous breeder of Frost-Resistant Peach varieties. Frank and Frankie are two of several outstanding creations that have set production records. By his request, Wolfe Nursery is continuing his breeding work in Peaches.

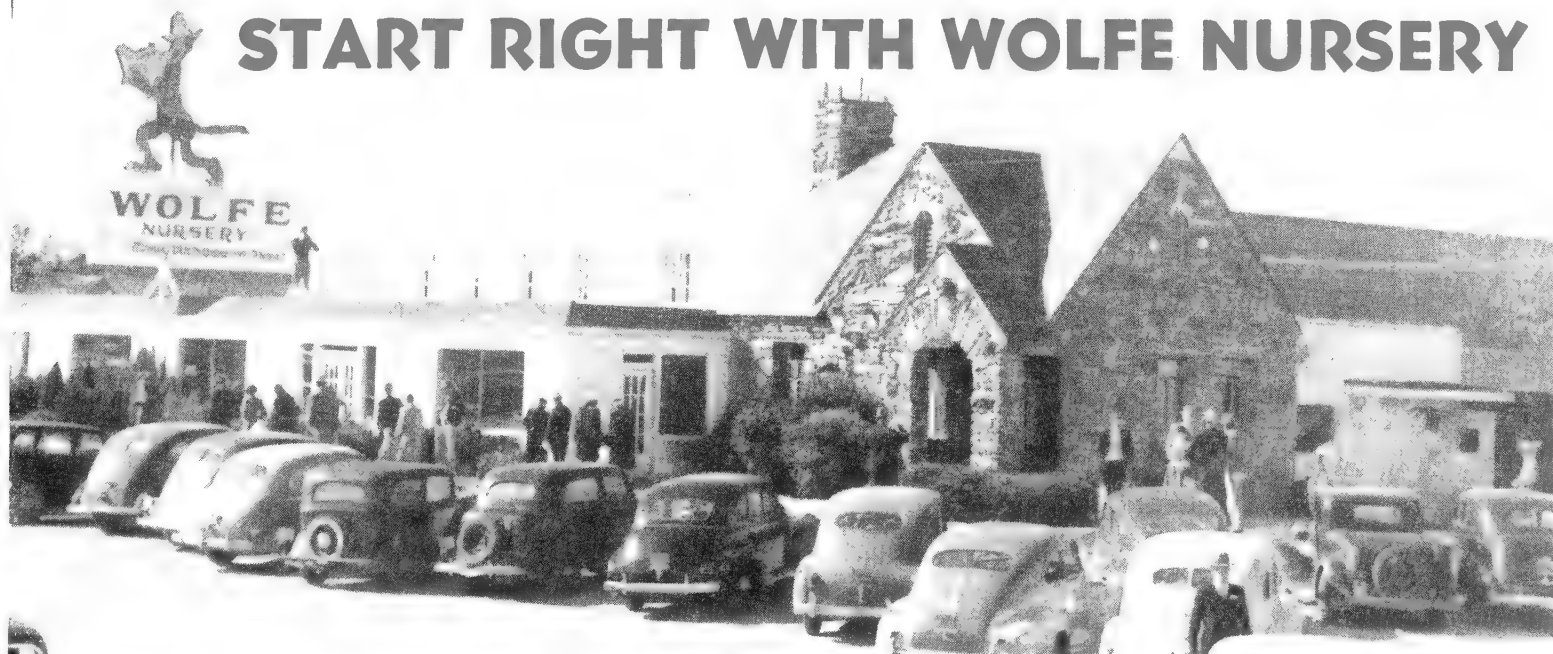

T. V. MUNSON

World famous for creation of over 100 new Grape varieties. Carman is the leader. Received many medals from France and other countries. We purchased the famous Munson vineyards to preserve his many varieties and continue his work.

Follow The Cars to **WOLFE NURSERY** for Quality

Pictured below is a front view of our modern indoor sales and display room. Our Mail Order Department is on the second floor. Storage, packing and shipping departments are on the first floor. Our own Post Office and Express Office are on the other side of the main packing department. Tourists from every state have visited the **HOUSE THAT TIME BUILT**, made of petrified wood and rare fossils from all over the world. This is now our reception room. Follow the cars to Wolfe Nursery—1 mile due west of Stephenville—for an interesting and profitable trip. Visitors always welcome!

JUMBO FRUIT TREES

That Bear First Year after Planting

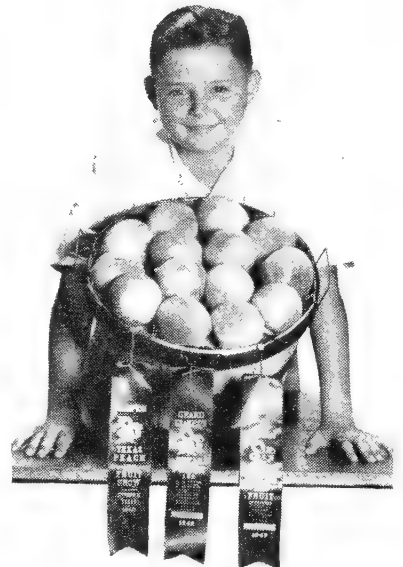

*Now you get **DOUBLE VALUE** for Same old Price*

For thirty years, Wolfe customers have been asking—"Don't you have fruit trees that will bear the first or second year?" Now for the first time we can say "YES". People visiting our nursery fields this past summer were astonished to see big Peaches, Apricots, Plums, Pears and Apples hanging on nursery row trees that will be delivered this winter and spring. Now you get twice the size tree with two-year bearing top for the same price as ordinary trees. Your first good crop of fruit will more than pay the cost of trees, planting and care. Not just bearing size trees, but trees that are already bearing. While ordinary nursery trees are growing—Wolfe's Jumbo Trees are bearing!

Grand Champion **FRUIT**

Peaches and other fruit from WOLFE GROWN Trees have been Grand Champions at the TEXAS PEACH and FRUIT SHOW for several years. Our never ending search for new and finer varieties for the South and Southwest has resulted in FRUITS that are ideal for every HOME ORCHARD and COMMERCIAL planting. The work of ROSS R. WOLFE (Founder), E. E. RISIEN—(Gold Medal Pecans), J. W. STUBENRAUCH (Frost-Resistant Peaches), T. V. MUNSON (World Famous Breeder of Grapes) will live at Wolfe Nursery because of their contribution to a more beautiful and fruitful world.

World's Largest Tree Digger

Pictured at left is the world's largest tree digger in action. This digger is powered with a 126 horse-power crawler tractor that goes down after WHOLE-ROOT SYSTEM. Sixteen men take part in the digging operation to pull the trees, grade, haul to storage and store in the shortest possible time. Wolfe Pecan and Walnut trees hardly know they have been moved. Every tree you get from Wolfe Nursery will live and get a head start if planted properly and cared for. Our Pecan and Walnut trees need not be pruned since they have sufficient root system to care for top growth.

Cane poles thrash profit from this demonstration Pecan orchard at Wolfe Nursery every year. Plant one or a thousand Pecan trees—it is the best investment you can make. Plant both early and late pollen shedding varieties for bigger yields. Early pollen shedders are: Garner, Western Schley, Stuart. Late pollen shedders: Burkett, Success and Giant-Mahan.

Plant Your Pennies and Watch Your Dollars Grow

Pecans are an investment that will pay big dividends the rest of your life, no matter how many trees you plant. A small investment in a Pecan grove will make money for you and for generations to come. Put Pecans in the proper soil and they immediately double the value of your land. Let us help you in selecting soil and varieties. Pecan trees will send your children and grandchildren through school, pay the taxes on your place and give you plenty for good all-winter feasting.

Plant Pecan trees at least 40x40 ft. in commercial plantings. That requires 27 trees per acre. 50 x 50 requires 16 trees per acre. We recommend planting 60 x 60 or 12 trees per acre. This allows inter-cropping or planting fruit trees in the middle until the Pecan trees reach heavy production. By planting 60 x 60 ft. you can plant 36 fruit trees which makes a combination orchard 30 x 30 ft.

HOW TO PLANT PECAN TREES

When your trees arrive, soak the roots in water for about one hour. Dig holes about 38 inches deep and 30 inches in diameter. Place the tree in the center of the hole and work good top soil around all the roots. Use plenty of water to pack the soil and get rid of air pockets. Tree should be planted about the same depth as it grew in the nursery. Wrap the trunk with heavy paper or burlap to prevent sun scald the first year.

Digs Roots like These

Wolfe Grown Trees LIVE!

You have gained nothing by planting a tree. It must live, make rapid growth and start early, heavy production to make your investment worth while. Isn't it reasonable to expect trees like those pictured at right to be far superior to hand-dug trees? We know it. We used to dig our Pecan trees by hand and the trees don't even compare with machine-dug trees. Sure! We spent a lot of time and money to accomplish MACHINE-DUG trees, but we have something to be proud of and trees that will pay off for our good customers. In short, we can now give you more for less money. Stay with Wolfe Nursery for superior nursery stock. Wolfe Nursery will STAY WITH YOU. Pecan tap roots are pruned at 38 inches.

Thomas Black Walnut

No. 11-1. This **Jumbo**, thin shell Black Walnut will grow and bear anywhere. The actual size photographs at the left below show what big kernels you get and, are they good! Pick bushels of these big, delicious Walnuts from your own trees and store them for those cold winter days for eating fresh or making tasty candies. Thomas Black starts bearing the first year in our nursery rows. It is a fast grower and will make a beautiful, valuable shade for your home. Some trees are now producing from 20 to 30 bushels of giant Walnuts that sell for fancy prices. Labeled with 2 RED stripes.

A Thomas Black 3-year-old tree was loaded with over thirty big Walnuts that look as big as baseballs. Our supply has never met the demand. Self-fertile.

American Fruit Growers Magazine gives Thomas Black first place over all Walnuts.

The New York State College of Agriculture reports that Thomas Black has been by far the most successful variety.

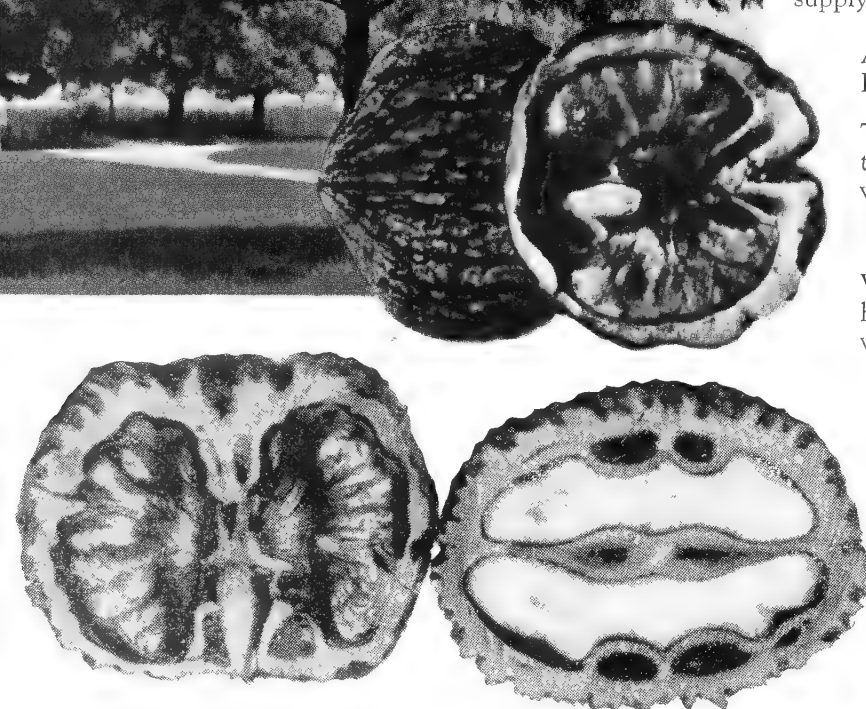

Machine-Dug Root System

We are now digging Walnut and Pecan trees with heavy machinery in order that our customers may get whole-root systems. Big crawler tractors pull a mechanical digger that lifts the heavy root system out without cutting or damage. Good root system for early, heavy production.

ENGLISH WALNUT

No. 11-2 WILSON WONDER ENGLISH WALNUT

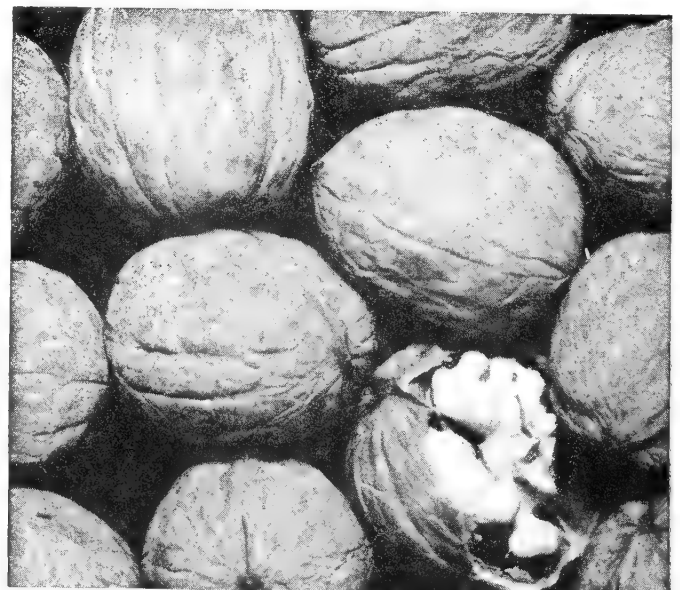

The Wilson Wonder is the only English Walnut that did not winter-kill at our nursery during the severe weather of the past two winters. Fast growing and one of the most beautiful of all trees. Bears very young. Nuts large and good quality. Trees have smooth white bark, dark green, extra large foliage. We consider the Wilson Wonder one of the best shade trees for our section. None of the English Walnuts are dependable bearers in the Southwest, but this one will bear some nuts and you will take great pride in showing them to your friends.

BURKETT *It turns pennies to dollars*

Burkett

No. 10-1 BURKETT

The leader and will continue to be in Western varieties. It is a regular and heavy producer of large, round, fat Pecans that bring top market prices. As long as we have been in business, the market demand for Burkett and Garner has never been supplied. Its flavor cannot be equalled. Plant Western Schley, and Garner, with Burkett for perfect pollination. Plant only in altitudes of 600 feet and up and on well-drained land. Burkett is labeled with one BLUE stripe.

PRICES

2 to 3 ft. size trees	\$2.40 each
3 to 5 ft. size trees	4.10 each
5 to 7 ft. size trees	6.40 each
7 to 9 ft. jumbo	8.50 each

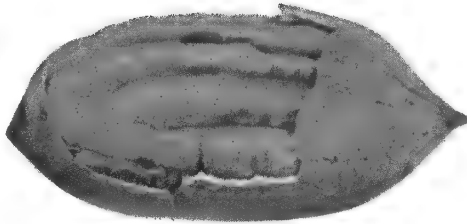

Wolfe's GOLD MEDAL PECANS

No. 10-2 WESTERN SCHLEY

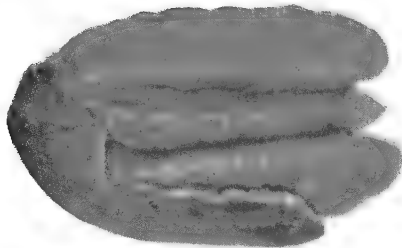

The perfect cracker in the large Pecan class. It never fails to prove that "Money DOES Grow on Trees." The tree is remarkably healthy, a strong grower, early and heavy producer. Western Schley is a genuine Risien Gold Medal Pecan, and, remember—they bear young, even in the nursery row. Resistant to scab and rosette. Labeled with a GREEN stripe.

PRICES

2 to 3 ft. size trees	\$2.40 each

5 to 7 ft. size trees	6.40 each
7 to 9 ft. jumbo	8.50 each

Western Schley

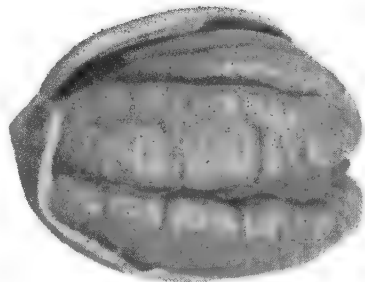

Stuart

No. 10-4 STUART PECAN

Stuart comes nearer to being well adapted to all sections of the country and all soils than any other variety. It is an excellent producer and a hardy, fast growing, healthy tree. The meat has a real Pecan flavor and the shell is medium thick—somewhat brittle. The average Stuart will run 48 to 50 per cent kernel. As you can see by the actual color picture at left, the Pecan is large and always well-filled. The trees bear regularly and are highly resistant to scab. Stuart is labeled YELLOW.

PRICES

2 to 3 ft. size trees	\$2.40 each
3 to 5 ft. size trees	4.10 each
5 to 7 ft. size trees	6.40 each

Success

No. 10-3 SUCCESS PECAN

This most popular Eastern variety is in demand because of its excellent flavor, large, plump, smooth, creamy kernels that release perfectly from the thin soft shell. Forty of the big nuts usually make a pound and it tests high in meat content. The tree is a beautiful, vigorous grower and highly resistant to scab. It heads low and makes an ideal variety for yard planting. Success ripens a few days later than Stuart. Both are very polliniferous. DON'T FORGET Wolfe's MACHINE-DUG ROOT SYSTEM makes the difference. Success is labeled with one PINK stripe.

Wolfe Nursery **FIRST** in Paper

FIRST in machine-dug root-system, better varieties,

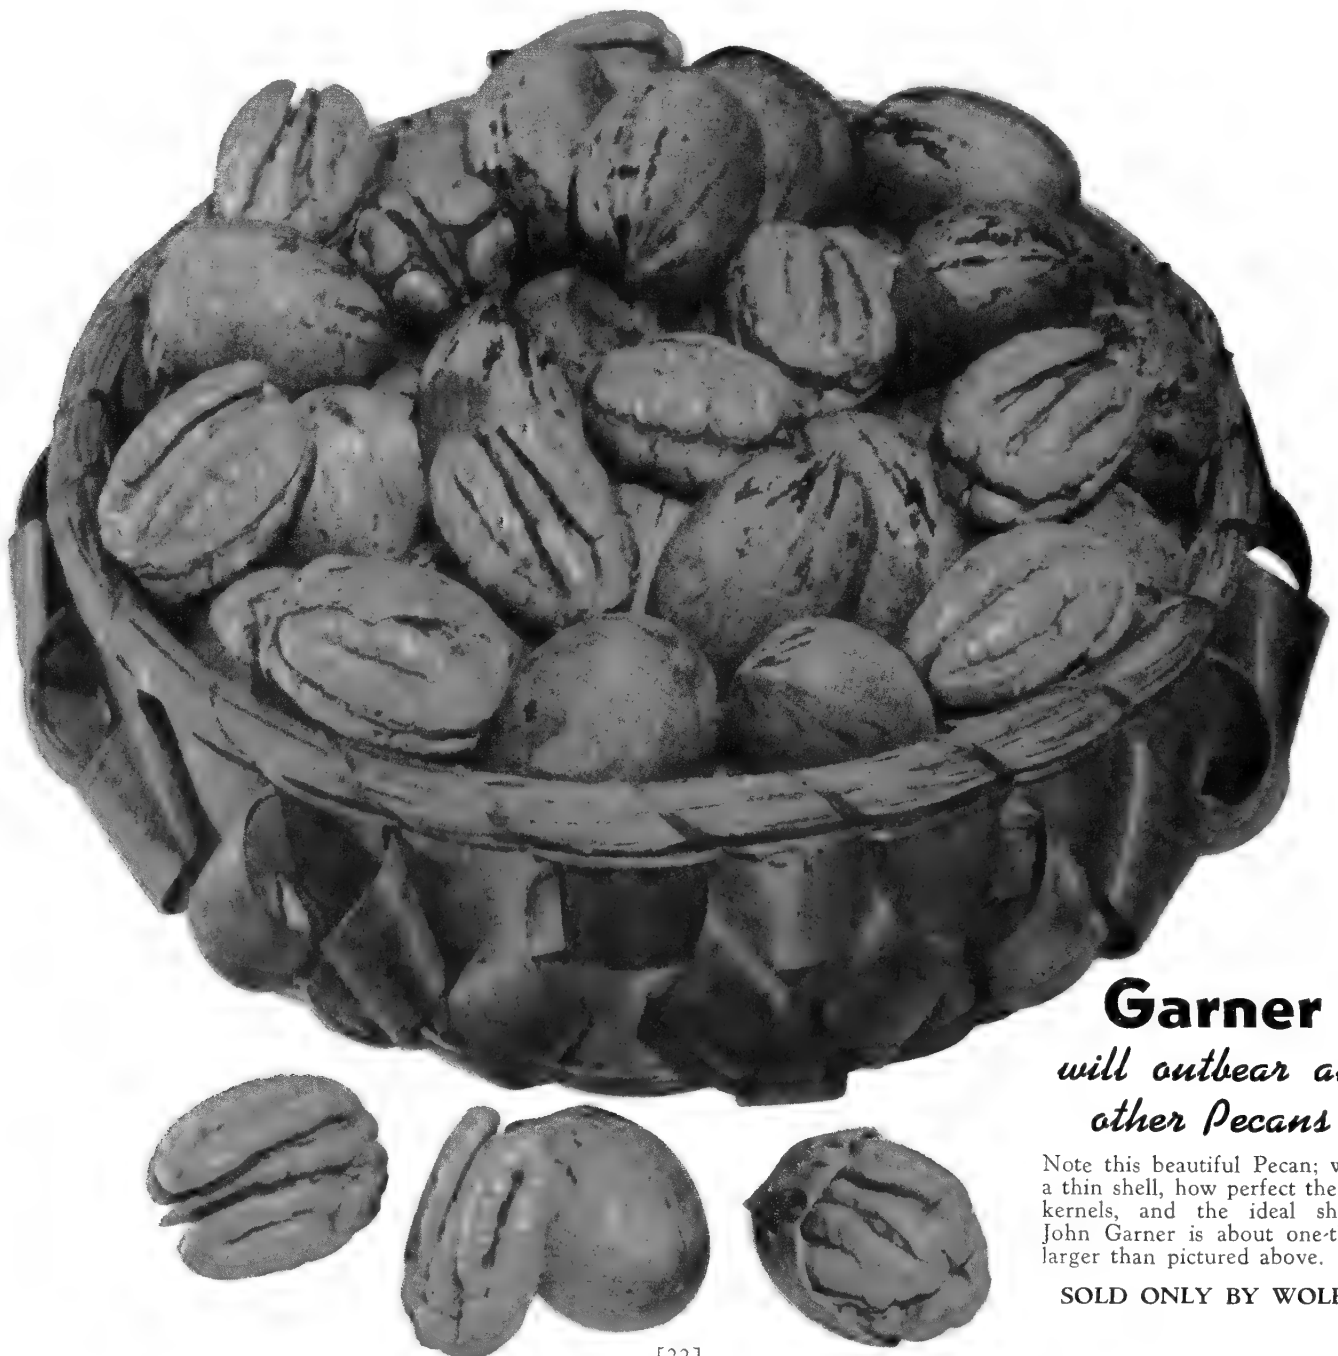

No. 10-5 JOHN GARNER PECAN

Plant your pennies and watch your dollars grow. Garner starts growing dollars in a hurry. We have fruited this great Pecan alongside of many others during a period of 16 years and it has made more money per tree than any other. We have never been able to supply the demand. Garner will bear at least one-third more per tree than other Pecans and produce nuts the first or second year after you plant them. WHY? Because Garner just naturally bears young. Add this desirable trait to Wolfe's "Machine-dug" root system that reduces "TRANSPLANT SHOCK"—the use of FRUIT BUDS in propagation and you have the answer to why people prefer Wolfe's Garner Pecan trees. Garner is FROST-RESISTANT—bears every year and is one of the first to mature in the fall. It is a TRUE paper-shell—so thin it can be cracked with the fingers. The creamy, delicious kernels are extremely rich in oils, proteins, carbohydrates, vitamins and distinctive flavor. Plant in uplands of sections only at altitudes of 600 feet and UP. Garner is one of the most outstanding Western varieties ever discovered. Should be planted with Mahan for best results. Order your trees early. Get the benefit of early rains. Garner is labeled RED.

PRICES OF JOHN GARNER

2 to 3 ft. size trees	\$2.95 each	5 to 7 ft. size trees	\$6.90 each
3 to 5 ft. size trees	4.75 each	7 to 9 ft. heavy branched bearing size	9.50 each

R. O. STYRON, Cleburne, Texas, reports: "My GARNER tree bore eleven nuts the first year, forty the second year, and eighteen pounds the following year. Garner is a miracle Pecan."

Garner
*will outbear all
other Pecans*

Note this beautiful Pecan; what a thin shell, how perfect the big kernels, and the ideal shape. John Garner is about one-third larger than pictured above.

100% live, faster growth, early-heavy bearing and service!

No. 10-6 GIANT-MAHAN

Can you imagine Pecans so large that the clusters of nuts look like bananas on the trees? That's Giant-Mahan—THE WORLD'S LARGEST PECAN. The nuts look somewhat like Schley but they are more than twice as large. Giant-Mahan is also a true brittle paper-shell and brings more money per pound than any other Pecan. This variety has become increasingly popular due to the healthy, vigorous growing tree which makes a beautiful shade specimen. It grows upright and puts on dense, dark green foliage. The leaves are extremely large. Added to this feature, it is adapted to all sections and is resistant to common diseases. Giant-Mahan is a heavy producer and our Machine-Dug root system enables them to start bearing soon after you plant them. Giant-Mahan and Garner make an ideal pair for home or commercial planting. Mahan is labeled with one WHITE stripe.

PLANTING *and* CARE OF PECAN TREES

— Culture —

Pecan and Walnuts: It is much better to have the holes dug before the trees arrive from the nursery. Regardless of whether the holes have been prepared or have to be dug, keep the root system covered with moist material until the trees are planted.

Wolfe's Pecan trees, machine-dug and whole-rooted, will require a hole at least 40 inches deep and 30 to 36 inches in diameter. WOLFE has gone to a great expense to secure a Pecan root system that will LIVE. The tap root has been cut approximately 38 inches below the ground and all of the lateral roots above the cut have been preserved. Dig the holes large enough to receive the roots without bending, and deep enough to set the trees 2 inches deeper than they stood in the nursery row. This depth can be determined by closely examining the bark. The bark that was below the ground will look dark; that which was above the ground will be a grayish color. The off-set on the trunk and the paint mark used for labelling should not be mistaken for the ground level.

When you plant your Pecan or Walnut trees fill the space around the roots with only fertile top soil. DO NOT PUT FRESH MANURE OR COMMERCIAL FERTILIZER IN THE HOLE. Pack the soil around the roots to eliminate air spaces. Pour water in the hole as long as the ground will absorb it completely. When the soil is filled with water, do not water any more until the trees need moisture during the dry months. When trees are watered continuously, the soil becomes mushy and oxygen is driven from around the roots. Such condition results in the trees failing to produce foliage in the spring, even though the bark remains green. If the roots cannot get oxygen, the trees will eventually die.

After the trees have been set in a permanent location, wrap the trunk loosely with burlap or heavy paper. The height of the wrapping material will depend on the size of the tree, but it should extend to and not above the first branch. The wrapping material will prevent borers from getting into the trunk and will also protect the trunk against sun scald. When the trees have developed enough top to shade the trunks during the hottest part of the day, the material may be removed.

Persimmons

No. 8-2 EUREKA

A very hardy variety with a most delicious flavor. Sometimes seedless. Big red fruit literally covers the tree and hangs until soft ripe. Our system of using fruit-buds causes Wolfe-grown trees to produce young and heavily. When served with a few drops of lemon juice, sugar and thick cream, Eureka is a dish fit for a king. Eureka is labeled YELLOW over WHITE.

No. 8-1 TANE NASHI

A long, bright orange Jap Persimmon that is seedless. Finest quality to be had. We have picked Tane Nashi when snow covered the ground. What a beautiful sight! Persimmons with a white snow background. It is frost-resistant and widely adapted. Deliciously flavored. Plant trees 20 feet apart.

Tane Nashi is labeled YELLOW over RED.

No. 8-3 NEW WRINKLE

A new Wolfe introduction. We tested this grand new variety several years to make certain that it met all our standards before it was offered to our customers. New Wrinkle is a cross between Eureka and Tamopan, and is the first Jap strain developed in America and offered to the public. It is larger than Eureka and so square that it looks to have grown in a box. The quality and taste are superior. Labeled YEL-

LOW over BLUE.

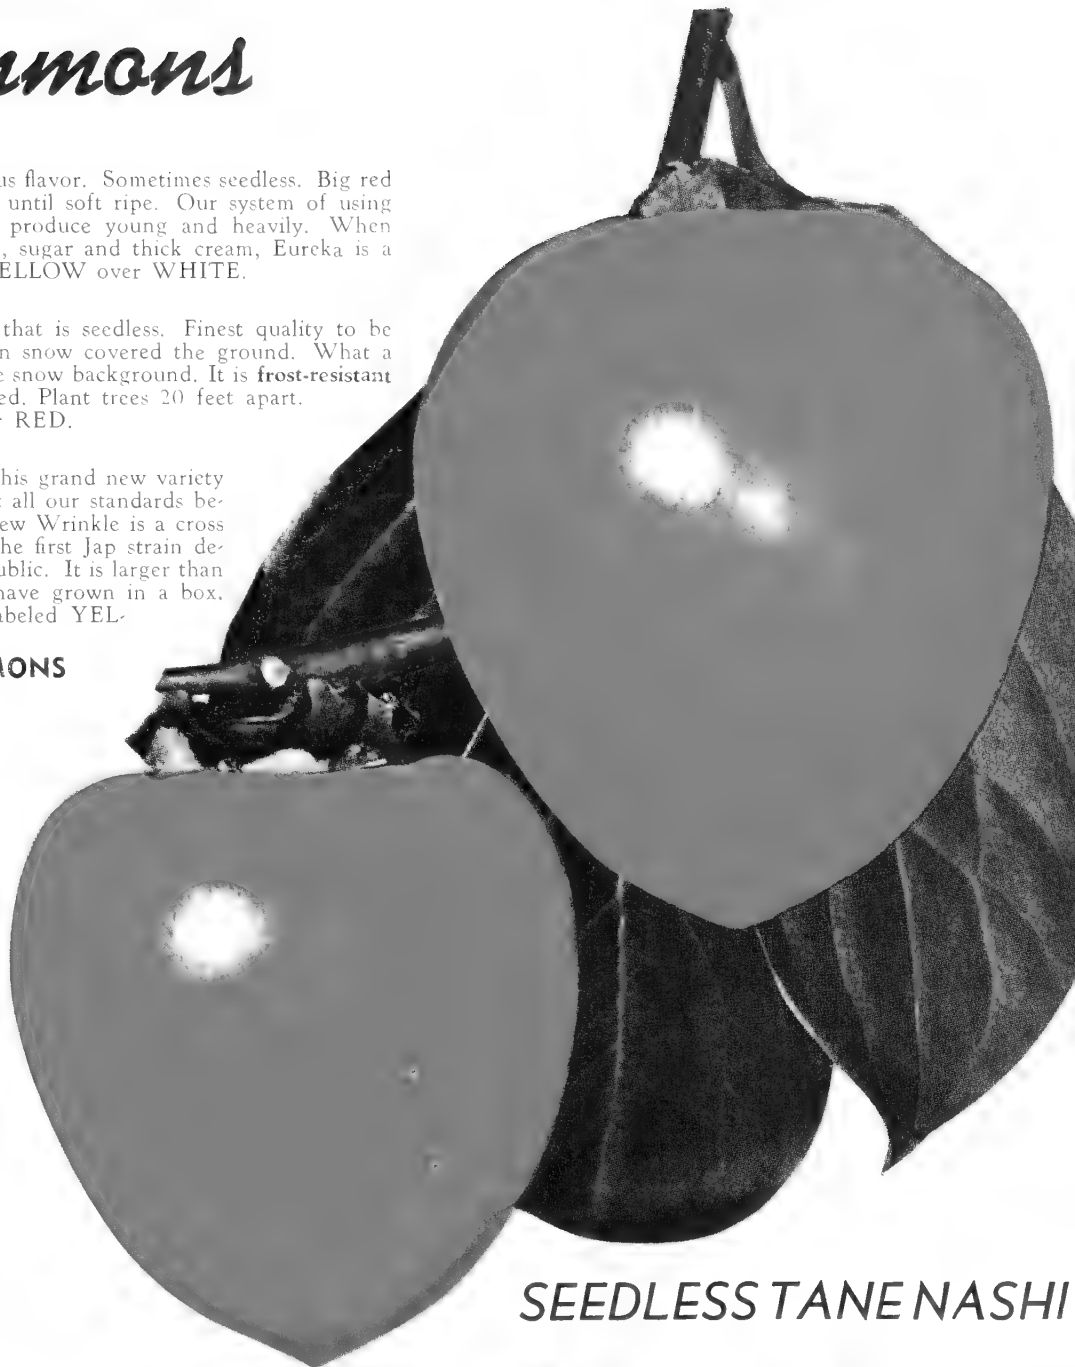

PRICES OF ALL PERSIMMONS

2 to 4 ft. trees \$1.75 each

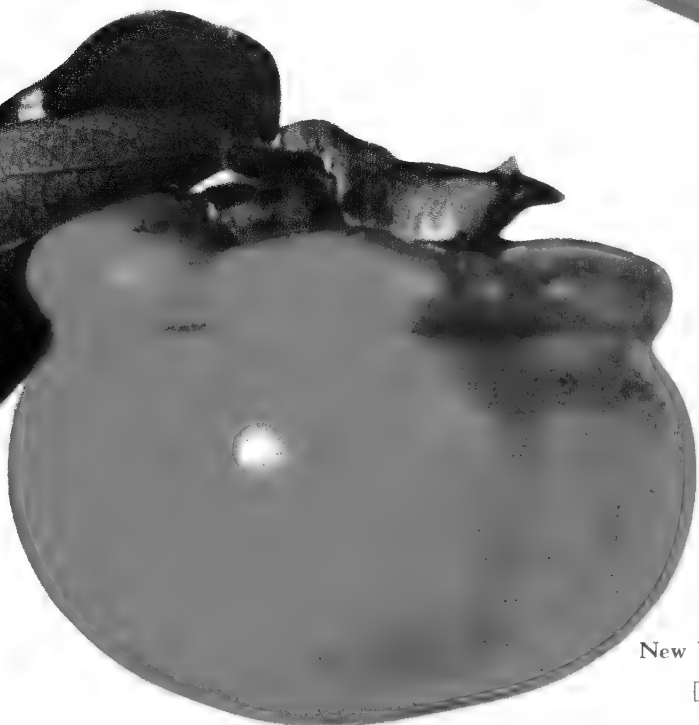

4 to 6 ft. trees 2.75 each

A DISH FIT FOR A KING

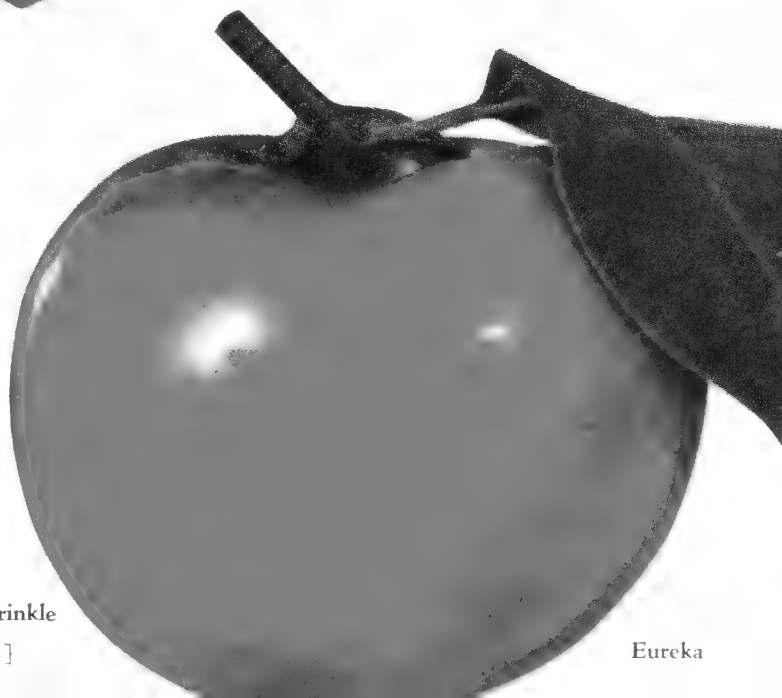

The most beautiful tree and fruit grown. Picture a tree with large, green, waxy leaves like a Magnolia just covered with large, orange-red Persimmons that make a dish fit for a king. The leaves turn all shades of beautiful colors during autumn and after they fall you really have a show of big fruit. We have never been able to grow enough trees to supply the demand. Persimmons will grow from the Gulf Coast and as far North as Cotton.

SEEDLESS TANE NASHI

Better Grapes

For Eating Fresh, Juices, Jams,
Jellies, Wine and Profits

No. 5-4 THOMPSON SEEDLESS

Is that Grape that you rush to the grocery store to buy before they are all gone. Now that's a lot of trouble, and the cost of a few bunches at the store will buy enough vines to produce all the sweet, delicious Thompson Seedless Grapes that you can use. Yes, and some for your neighbor, too. A few bunches of this grand Grape will make a mighty friendly neighbor. Plant some of our select Grapes—say at least one of each variety, in your back yard, on the fence or even in the landscape planting. Always room for the garden of Eden fruit. Thompson Seedless is adapted to arid and semi-arid sections where the nights are cool and soil is well drained. Are Peaches included in your order? Don't overlook a good bet. Thompson Seedless is labeled YELLOW.

Thompson
Seedless
Sweet and
Juicy Good

No. 5-2 NIAGARA

The Grape with a distinctive flavor and worthy of a place in your planting. This hardy prolific Grape is another of our selections from a long list of good varieties. It is a vigorous grower that produces an abundance of light green to white, compact bunches. Don't leave Niagara out of your planting if you want a Grape with a delicious tang. Niagara is labeled WHITE.

No. 5-3 CONCORD

This large, juicy, sweet, tender fleshed Grape ripens in August when everyone is hungry for a handful of good eating. The clear skinned, purplish black Concord bears heavy crops the second or third year after planting and the strong, healthy vines produce for many years. Did you read about Holland Apple on page 14? Concord is labeled BLUE.

No. 5-5 DELAWARE

There has probably been a greater acreage planted in Delaware than any other red Grape. This beautiful, compact variety has juicy, sweet flesh of the finest quality for both table and wine use. It is adapted to a wide area and considered one of the heavy production varieties. It is a good commercial Grape and your home orchard will not be complete without Delaware. Labeled ORANGE.

Carman

THE ALL PURPOSE GRAPE

Bears Second Year

No. 5-1. Is one of the sweetest Grapes grown. We put up hundreds of gallons from our vineyard at Comanche, Texas. Carman makes large, compact bunches of Grapes and is a very heavy producer. It is a regular bearer of firm, glossy black Grapes that melt in your mouth. It is adaptable to most any section and ideal for home or commercial planting. Carman is one of the famous Munson Grapes that combine the best quality of several varieties. It is **mildew-resistant** and is seldom attacked by leaf folder. Carman is labeled with a RED stripe.

PRICES ON CARMAN

Jumbo, heavy, bearing size	\$0.80 each
No. 1, large	.60 each

For information on pruning and training Grapes, ask your County Agricultural Agent for Texas Agricultural Experiment Station Circular No. 89, or write to the Director of the Texas Agricultural Experiment Station, College Station, Texas.

PLANTING HELPS

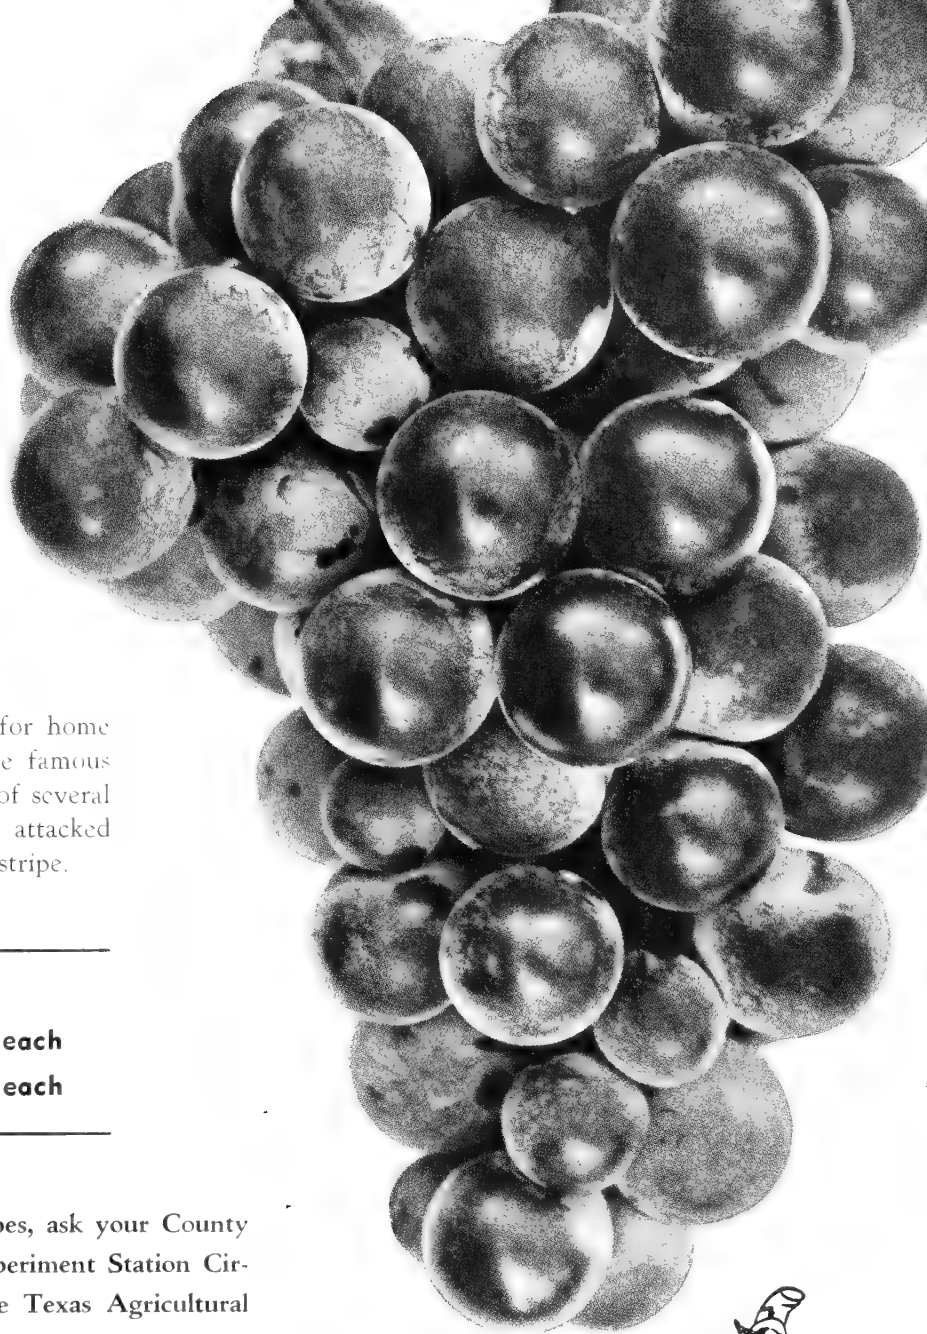

Plant Grapes 8 feet apart in the row and in 8-foot rows. This gives 680 Grape vines per acre. Planted 10 feet gives 430 plants per acre, and at 12 feet gives 302 plants per acre. Sandy soil is ideal for Grape vineyards. Never prune Grapes while sap is flowing.

Rossberry

13-3 ROSSBERRY

HAS EVERYTHING and promises to be the sensation of quick-freezing. It is huge in size, and has the unusual combined flavor of Raspberry, Loganberry and the sweet Blackberry. It fruits the first year after planting and withstands cold and drought. It actually likes dry weather. Remarkably free of the usual diseases. Small, soft seeds are very few. Now growing in over sixty Federal and State Experiment Stations. First berry to ripen and a very heavy producer. 600 gallons per acre. Grows on a trellis and very easy to pick. See picture above. When you pick a Rossberry, you really have a mouth full. The greatest berry I have ever found. As told by the original grower, Rossberry was created by Luther Burbank and went undiscovered for many years.

COMBINED FLAVOR OF
Raspberry, Blackberry, Loganberry

Ed Girard says: "I have spent my life growing berries and Rossberry is by far the best of all."

Clint Boyd with three acres, says: "Rossberries are superior to any other berry I have ever grown."

"I have ten acres of Rossberries in bearing and I have never grown a bigger money maker."—J. B. Smith.

"Much better than Boysenberry."—Pate Martindale.

Thornless Boysenberry

No. 13-2. Is a huge maroon-red-purple berry that often measures 1½ to 2 inches long. It bears in large, loose clusters and is a grand berry for home and market use. The juicy, tangy, sweet, sub-acid flavor makes it ideal for eating fresh, canning, for pies, jams, jellies and juices. It is absolutely thornless. It is adapted to a wide range of soils and climatic conditions and thrives on back-yard fences. Plant 6 feet apart for all the delicious berries you can eat. Planted 8 feet by 8 feet, 680 plants will set an acre. Boysenberry is **frost-resistant** and **disease-resistant**. It is sweet and juicy, yet amply firm to withstand shipping. Our supply of berries and plants has never met the demand. Order early.

PRICES—PREPAID

10 for \$1.50; 25 for \$3.50; 100 for \$13.00; 500 for \$55.00

Rosberries as they grow. Easy to pick and a real money maker. Put that idle land to work and profit from \$300.00 to \$400.00 per acre. Plant 8 feet by 8 feet. 680 plants per acre.

Wolfe's Wonder Dew-Blackberry

No. 13-1 DEW-BLACK

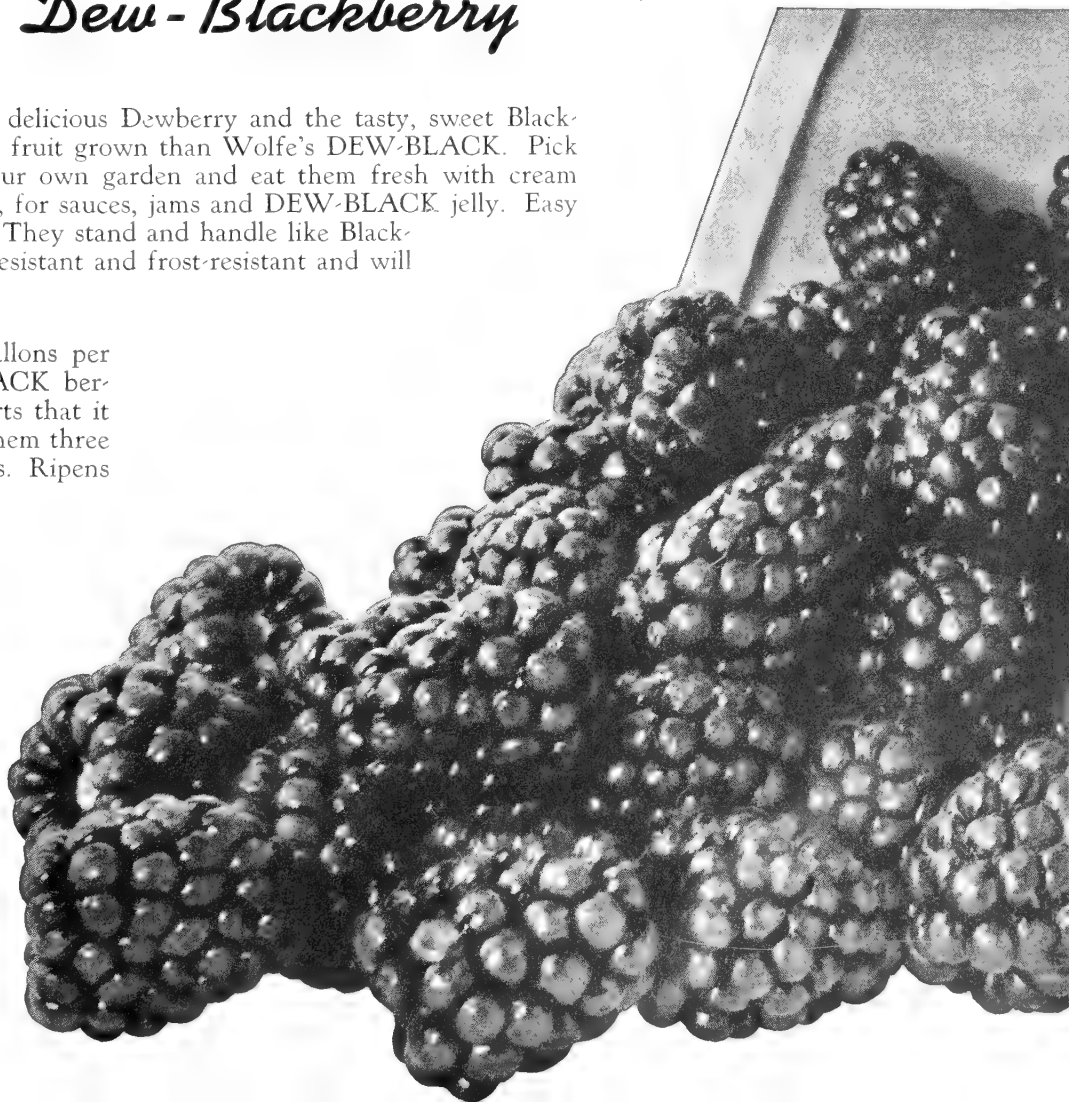

A wonderful cross between the old delicious Dewberry and the tasty, sweet Blackberry. There is not a more delicious fruit grown than Wolfe's DEW-BLACK. Pick these big, tempting berries from your own garden and eat them fresh with cream and a little sugar, in pies, shortcakes, for sauces, jams and DEW-BLACK jelly. Easy to grow and hardy most anywhere. They stand and handle like Blackberries. DEW-BLACK is drought-resistant and frost-resistant and will produce a crop every year.

We harvest from 1500 to 2000 gallons per acre. We have shipped DEW-BLACK berries to 44 states and everyone reports that it is a most outstanding berry. Plant them three to four feet apart and in 6-foot rows. Ripens through May and June.

WOLFE NURSERY

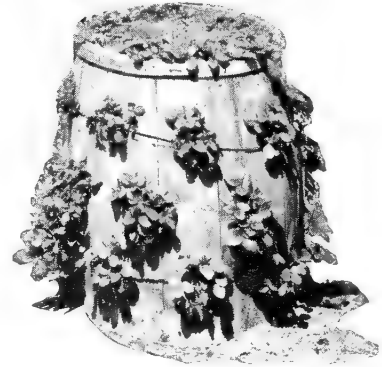

Wolfe's Strawberries

A BARREL OF STRAWBERRIES AND A BARREL OF FUN

Barrel of Strawberries and a barrel of fun. Now that the war is over, pick up a hobby and have yourself some fun. May I suggest a barrel of Strawberries? You can have Strawberries for breakfast twice a week if you will get this bargain offer of 50 healthy Strawberry plants for only \$1.75. Bore 40 1-inch holes in the side of a barrel and set 10 plants on the top. Use just ordinary top soil and set the barrel where it will be in the shade in the hot afternoons. Bore a few small holes in the bottom for drainage. Keep the long runners pinched off and then serve the big delicious, clean red Strawberries for your family's breakfast.

25 Klondyke and 25 Blakemore. Prepaid. **\$1.75**

Gem Everbearing

This giant Strawberry is fast becoming the most popular everbearing variety. Almost every place Strawberries are grown, Gem is proving a grand success. The large, firm, bright red berries are of very high quality. They are even better than this picture, and what a flavor—nothing like a heaping bowl of delicious Strawberries for breakfast, or eating fresh out of your garden, in the evening after work. Gem will start bearing 60 to 80 days after planting, and will produce lots of good eating until frost.

STREAMLINER

SENSATIONAL EVERBEARER FOR THE SOUTH

The largest Strawberry grown. Some as large as hen eggs. Streamliners planted in Fort Worth last February started bearing in March and were picked all summer and through Christmas. A Fort Worth grower says: "Streamliner produces more of the best Strawberries than any we have tried in 17 years. They continued to bear through 25 degrees of weather." Mulch the ground heavily with straw or sawdust to keep the heavy berries off the ground. Find a place in your planting for this huge, fancy, rich-flavored Strawberry.

**Price: 25 plants, \$1.50; 50 plants, \$2.75;
100 plants, \$5.00, postpaid**

CULTURE

Strawberry: Plants may be set at intervals of 10 to 12 inches in rows $2\frac{1}{2}$ to 3 feet apart. Set the plants at about the same depth as they were before being dug, with the crown even with the top of the ground. Pack the dirt firmly about the roots. **CAUTION:** Do not cover the buds in the center of the plant with soil. If the bud is covered, the plant will more than likely delay blooming or die. Plant up on flat beds about 6 inches above the ground level.

LET'S TALK ROSES!

Texas grown Roses have a bad name. Why? For several reasons. First, most of the plants have just been grown to SELL with no regard to proper culture, grading, or handling. Four years ago, we became so disgusted with the quality of Rose bushes that we were able to buy, that we decided to grow our own. We employed a Rose specialist—a man who had worked for the Texas Rose Experiment Station for 11 years and had been growing Roses for 17 years. Our first crop of Western Grown Roses was harvested 2 seasons ago and we were pleasantly surprised with the results. Since then, we have sold out on a few varieties and had to buy—with the same old results—complaints from customers and refunding their money. Now, for the first time, we can guarantee to supply Western Grown Jumbo Bushes in both Standard and Patented varieties—direct and fresh from our nursery.

Our bushes are grown on rich, sandy loam, with a tight, red clay sub-soil that holds plenty of moisture for steady growth through the hot, dry summer. The canes harden as they grow and our arid climate prevents leaf spot and die-back disease. Our only problem thus far has been keeping the bushes from getting too large. Our customers like big, healthy bushes, so that's the way we'll grow 'em. Compare our Roses with any in the Nation—if they are not far better than any you can get from another source, then you keep our bushes and we'll refund your money. Regardless of where you buy Roses—don't accept shriveled plants. Send them back and get your hard-earned money refunded. The same thing applies to Wolfe Nursery—if you ever get anything that is not entirely satisfactory, please let us know. When you buy from us, we want you to get more than your money's worth.

No. P-1 PEACE

 Certainly this All-America Winner for 1946 is one of the most beautiful of all Roses. Perhaps its chief beauty is the great range of colors through which it passes. The full ovoid bud is deep yellow, with the edges of the petals picotee cerise. It slowly opens to a glorious 5-inch bloom with shades of canary-yellow, pale gold, cream, pearly white, and apple blossom. Although the bloom is unusually large, double and long-lasting, the dainty coloring gives it marvelous beauty. The plant is just as large and fine as the blooms, being above average in size, and the flowers are borne on long straight stems above the vigorous shining foliage. The fragrance is moderate. No such amazing combination of strong stems, fine lasting qualities, and huge, perfectly formed, delicately colored Roses, ever existed before. Plant Pat. No. 591.

Price: \$2.00 each, postpaid

SUTTER'S GOLD

1950 AARS Winner Bagatelle Winner

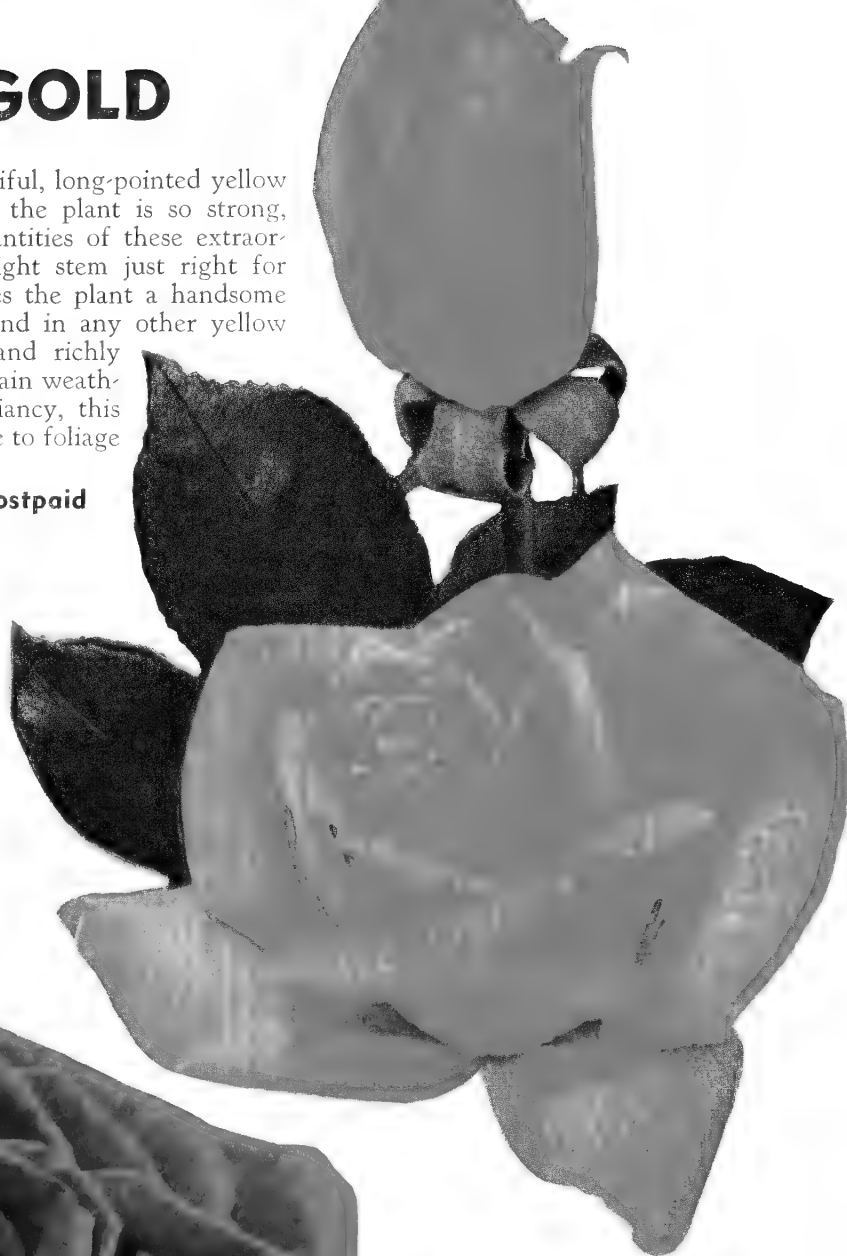

The outstanding feature of Sutter's Gold is its beautiful, long-pointed yellow bud, richly shaded with orange and red. Because the plant is so strong, vigorous, and free-branching, it produces great quantities of these extraordinarily fine buds, each one borne on a long straight stem just right for cutting. An abundance of large glossy leaves makes the plant a handsome one. The flower has a rich Tea fragrance not found in any other yellow Rose. The 24-petaled flowers are high-centered and richly colored when they burst open but, sometimes in certain weathers, they tend to open quickly and lose their brilliancy, this being the only serious fault of the variety. Resistance to foliage trouble is a valuable characteristic of Sutter's Gold.

Price: No. 1, Jumbo Bushes: \$2.00 each, postpaid

No. P-3 NOCTURNE

 This fine red Rose has one of the longest and most perfect, streamlined buds of any red Rose. The color is bright cardinal-red, with intriguing darker shadings of Chrysanthemum-crimson, these deep dark shades being emphasized in cool weather. In hot weather the color becomes somewhat lighter and more bright. The large petals have good substance, are richly textured, and there are plenty of them so that the flower lasts a long time. The bush is big and sturdy with the stems long and stout, and the foliage large and luxuriant. Nocturne has proved itself to be an outstanding red Rose throughout the country.

Price, No. 1, Jumbo Size: \$1.50 each, postpaid

**WESTERN
GROWN
PATENTED
ROSES
CAN'T

FOR
QUALITY**

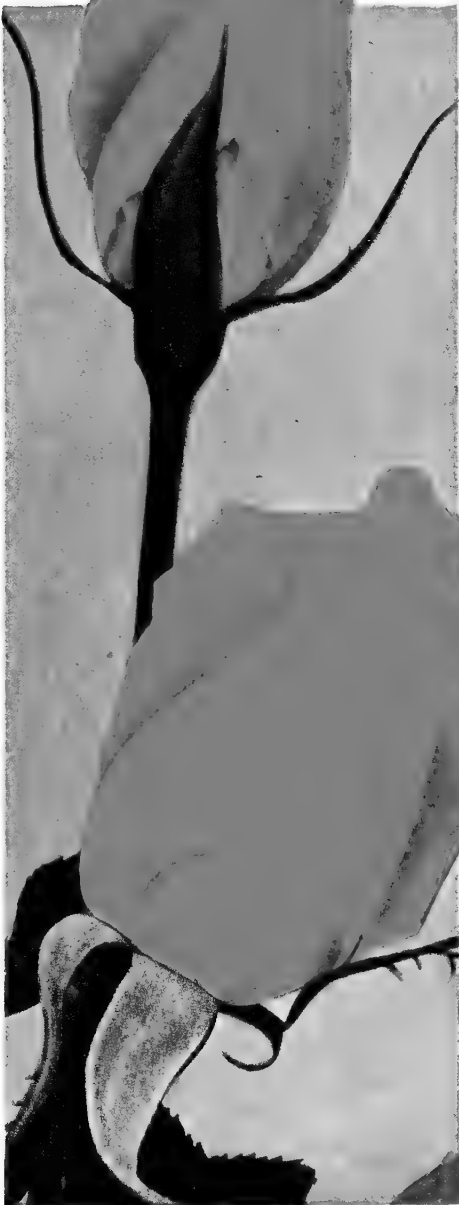

They Are Jumbo Bushes and
Guaranteed to Reach You in
Perfect Condition

No. P-7 *Charlotte Armstrong*

If you are planting it for the first time, you will marvel (as we still do) at the beauty of the lovely, long, carmine-red buds, with their perfect streamlined form, and at the magnificent open blooms of rich cerise. The open flower is usually 3 or 4 inches in diameter, with about 30 petals, high-centered, remaining a beautiful rich color until the last petal drops. It has only slight fragrance. No printer's inks can illustrate the richness of its color you have to see it to appreciate it.

A plant of Charlotte Armstrong will become one of the largest in the Rose garden for it is extremely vigorous, semi-spreading to upright, usually producing its flowers singly and always on long stems. The foliage is leathery, semi-glossy, deep green, and highly resistant to mildew. The plant keeps producing its amazing succession of long-stemmed beauties throughout the entire season. On Charlotte Armstrong every bud is perfect, and it produces hundreds of them during the season.

Price: No. 1, Jumbo Bushes, \$1.50 each, postpaid

Rose Charlotte Armstrong (Plant Patent No. 455)

**WE GROW
OUR OWN
ROSES—SHIP
DIRECT TO
YOU FROM
IDEAL STORAGE**

No. P-9 **TAFFETA**

 Taffeta is outstanding for its ability to produce many long-stemmed, perfectly formed, fragrant buds in the rich pink and salmon shades which almost everyone likes. Generally it is a rich carmine-rose in the bud, changing to begonia-rose in the open flower, but it will also show intriguing combinations of rose-pink, salmon, and apricot. Frilled and delicately veined petals make up the perfect slender bud which opens to a semi-double flower with about 21 crisp petals and a very pronounced fragrance. The plant is larger than average in size, vigorous and upright with big leaves of rich dark glossy green. A pleasing contrast in foliage is provided by the new growth which is always an attractive mahogany-red. Taffeta has done wonderfully well in all sections of the country—Pacific Coast, Middle West, East Coast, and South.

**Price, No. 1, Jumbo: \$1.50 each,
postpaid**

**You Wouldn't Eat a Green Peach!
We Don't Ship Roses Until They Are Ripe
(Dormant) After Dec. 15th.**

Culture

Roses: Keep the roots moist until the plants are set. Space plants 2 to 4 feet apart. Dig the holes large enough to permit spreading the roots in their natural position. Plant the Rose bush slightly deeper than it was originally, so that the bud will be just above ground level. Put only moist fertile soil about the roots and firm the soil with the hands and by watering.

Water Roses heavily when the soil approaches the dry stage and do not water again until the soil becomes almost dry. Wet the soil to a depth of 12 inches, or more, by turning a water hose into the Rose bed. Deep watering encourages a deep root system. Shallow watering restricts root development and is apt to result in injured roots during cultivation or baking during the hot summer. Do not water tops of Roses because wet tops encourage leaf spot.

WHAT IS A No. 1 ROSE?

A number one Rose has at least 3 canes over 18 inches while growing in the field. It is free of disease and must have 8-inch roots. A dead Rose bush can grade out as a number one—so we say that it must be in perfect, living condition when it reaches the customer—must grow and bloom. Our bushes are JUMBO No. 1's and will produce more and larger blossoms.

Try this examination on the next Rose bushes you receive. Stick your thumb nail into the green bark of the Rose bush. If the bark pops, the plant is in good condition. Examine for swivel.

No. P-5 DIAMOND JUBILEE

 This 1948 All-America Winner is robust and many-branched, sending out many long, sturdy flower stems, each carrying a big, ovoid bud in light pastel shades of buff, yellow and pale orange. The large, many-petaled blooms have stiff, heavy-textured petals. It certainly produces an enormous number of blooms, and the big plant has an abundance of big, dark green leaves. Plant Pat. App. for.

Price, No. 1, Jumbo: \$2.00 each, prepaid

No. P-4 NEW YORKER

The vigorous tall-growing bush will produce a continuous succession of huge, high-centered flowers of clear dazzling red. Delightfully fragrant and long lasting with big heavy textured petals it is a red, red Rose which stays red until the last petal falls. Plant Pat. No. 823.

Labeled RED over BLUE

No. 1, Heavy Bushes, 75c each, postpaid

No. P-8 FORTY-NINER

 Forty-niner is probably the most brilliantly hued bi-colored Rose ever introduced. Its spectacular blooms always stopped every visitor short, because they could hardly believe that such startlingly brilliant contrasting colors could be present in a Rose. Evidently it stopped the All-America judges also because they scored it so high that it could not miss getting an All-America Award. The inside face of the petals is a vivid Orient-red, changing to cherry-red with age. The outside of the petals is a rich chrome-yellow, sometimes overlaid with pink, changing to straw-yellow in the open bloom. This yellow color is most evident in the bud, while the red color dominates the flower when it is fully open. These glowing shades contrast vividly yet blend together beautifully.

No. 1, Jumbo Bushes

Price: \$1.75 each, postpaid

No. P-6 PINOCCHIO Below.

Immense clusters of perfect Baby Roses in the brightest, cheeriest, yet daintiest shades of salmon flushed with gold that you can imagine. Every little bud in the cluster is a perfect garden Rose in miniature, possessing a delightful fruity fragrance. Marvelous for boutonnieres, corsages, or small bouquets. The plant grows 20 to 24 inches tall, and requires no special care for splendid results. Plant Pat. No. 484.

Price: \$1.25 each, prepaid

OTHER NURSERYMEN Say WOLFE'S ROSES Are BETTER

Since we started producing Western Jumbo Roses, many nurserymen have journeyed to Stephenville to see our Rose fields. Without an exception, every one of them have said that we were growing the finest bushes they had seen. One question is common to all visiting nurserymen: "How can you afford to pay the postage on such large bushes?" Our answer: "Our customers like 'em big—and we don't have the usual expense of replacing bushes or refunding money."

When you see a Rose bush labeled with paint colors, you can say: "Those Roses were grown by Wolfe Nursery."

No. P-10 HIGH NOON

 All of the concentrated brilliance of sunshine at midday is captured in the lovely buds of this extraordinary new climbing or pillar Rose. The intense shade of clear shining yellow displayed in the medium-sized, well-shaped buds can not be found in any other Rose in the market today. It is not a rampant climber but is better described as a bushy 8-foot pillar Rose. It should be grown against a post, pillar, wall, or arbor to best display its beauty. Clothed with light green, glossy, mildew-proof foliage, it is fast growing and bushy, producing its many buds on long, almost thornless stems. Every brilliant little yellow bud is perfect for bud vase or buttonhole. The color is only one of the extraordinarily fine features of High Noon. In the spring High Noon becomes a gorgeous mass of brilliant bloom. But it does not stop there. It continues to produce additional bursts of bloom throughout the entire growing season. No other climbing Rose will do this, and it is going to be one of the most popular climbers ever introduced for mild climates. Plant Pat. No. 704.

Dr. J. H. Nicolas

CLIMBING ROSE

(Plant Patent No. 457)

Made from a color photograph, this picture shows the beauty and freedom of bloom of this remarkable new Rose. From late spring to hard frost the fully double, 50 to 60 petals, deep rose-pink flowers are produced. Very fragrant and they come on long stems fine for cutting. Very fine as a pillar Rose. Hardy as Paul's Scarlet and disease resistant. Fertilize it well as the more it grows, the more it blooms. The most popular climber we have sold.

Price: \$1.50 each, prepaid

Wolfe's Climbing Roses

—Number 1 Bushes

Western Grown—Disease-Free

No. 6-3 PAUL'S SCARLET CLIMBER

This popular Rose is the most admired of all climbers. It is a blaze of glory in the spring and the beautifully shaped scarlet blossoms literally cover the strong, graceful branches. In full bloom, it stops everyone who is passing by. Every flower lover should find a place for this Queen of Climbers. Paul's Scarlet is labeled with a BLUE stripe over a RED.

Price, delivered: 75c each

No. 6-2 TALISMAN CLIMBER

A "SPORT" of the beautiful bush Talisman, but a much heavier blossoming Rose. The two-toned, exquisite, long buds appear all over the gracefully erect stems early and continue all through the blooming season. Talisman is labeled BLUE over ORANGE.

Price, delivered: 75c each

No. 6-1 WHITE AMERICAN BEAUTY

If you have never seen this unusual white climbing beauty, you have missed a dazzling sight. The profusion of snow-white blooms standing out beyond the dark, glossy green foliage is a tribute to the Rose industry. Picture a Paul's Scarlet and American Beauty planted by the same trellis with the appearance that one climber is producing both white and red blooms. Gorgeous! American Beauty is labeled BLUE over WHITE.

WHY WON'T YOUR ROSES BLOOM ? Why do they DIE ?

If you have planted a "weakling" in any kind of a plant, you can't expect it to produce. I've seen a lot of Rose bushes that do well to stay alive, much less bloom. GET STRONG HEALTHY bushes and you'll make the pictures in this book look sick. GET No. 1 JUMBO Western Grown Bushes. Roses DIE because of several reasons but the most common cause is DIE-BACK disease. Examine your Roses when they arrive from the nursery. If the tops of the canes are black, they are diseased. Send them back and get your money. Wolfe's Roses are clean—disease-free—will grow and bloom profusely.

We Ship Only No. 1 Jumbo Bushes

No. 1-5 POINSETTIA

As brilliantly red as the Christmas flower for which it was named, with long stems supporting the sparkling buds on extra-good bushes. Here is a red Rose that has just about everything it should have, and which can stand comparison with the best of all.

Labeled RED over WHITE
Price: 75c each, postpaid

No. 3-1 EDITH NELLIE PERKINS

Coppery outside and delicate salmon-pink inside of petals, with heavily overspread tints of gold in high-centered, perfect buds make this a favorite two-toned pink. For fragrance, abundance of bloom and all-round desirability, it cannot be surpassed. Strong and attractive plants of this Rose should be included in your order.

Labeled ORANGE over RED
Price: 75c each, postpaid

No. 2-3 EDITOR McFARLAND

Even, glowing pink describes the bloom, which is free and abundant on a strong-growing bush. One of the most popular and dependable pinks and a great cut flower, it has enjoyed a long and merited popularity.

MAGNIFICENT *Flowering*

No. 12-4 REDBUD

Spring's early beauty. It blooms in March and April with a mass of showy dark pink blossoms covering the limbs. Use for a background or to decorate the outdoor living room in the spring. Soon makes a green shade for summer. Don't wait. Labeled RED.

Price: 2 to 3 ft., 60c; 3 to 5 ft., \$1.10; 5 to 7 ft., \$2.10 each

No. 16-21 MAGNOLIA SOULANGEANA

The most popular hardy Magnolia and many think the most beautiful of all flowering trees. One of the first trees to bloom in the spring, the delightfully fragrant flowers appear before the leaves. The blossoms are large, often 8 inches across, pink on the outside and white on the inside. The foliage is an attractive, shiny green. The tree seldom grows more than 10 feet tall and starts blooming when 3 feet tall.

Price: 18 to 24 inch size, \$1.95 each, prepaid

No. 12-5 SYCAMORE

Peeling bark, which comes off in large pieces, leaving a smooth, cream-colored trunk. The globular fruits hang on all winter. A large tree, tall and impressive, widely used for street planting.

Labeled RED over YELLOW

Price: 2 to 3 ft., 60c; 3 to 5 ft., \$1.10; 5 to 7 ft., \$2.10 each

No. 12-3 WEeping WILLOW

One of America's most beautiful shade trees. Our true Babylonian Willow lends a friendly atmosphere to the home and its long, light green limbs reach down to sweep the lawn. A gorgeous shade tree that invites you to a cool, restful spot during the hot summer evenings. A bank of Weeping Willows makes a lovely background for outdoor living rooms. Plant by rock garden, fish pond—wherever a graceful shade is needed. Labeled with a RED stripe of paint above a BLUE stripe.

**Price: 2 to 3 ft., 60c; 3 to 5 ft., \$1.10;
5 to 7 ft., \$2.10 each**

RESTFUL SHADE WHEREVER
YOU PLANT THEM

No. 12-2 MIMOSA (Weeping Silk Tree)

This unusual shade tree is in such great demand that we have never been able to supply enough trees. The young two-year-old **Mimosa** tree, pictured at right, gives you some idea of what a beautiful shade tree it makes. Has an umbrella-like top, with light green, feathery foliage that folds up at night. Fragrant, fluffy pink blossoms literally cover the arching limbs in the summer. Extremely hardy and adapted to all sections. Do not plant in wet spots. Mimosa is labeled RED over GREEN.

Price: 2 to 3 ft., 60c; 3 to 5 ft., \$1.10;
5 to 7 ft., \$2.10 each

No. 16-20 FLOWERING HOPA CRAB

The most popular Flowering Crab. Beautiful in bloom, beautiful in foliage, beautiful in fruit. In the spring, it is completely covered with the fragrant, bright pink flowers. From midsummer to frosts, the clusters of small, red fruit gleam brightly along the branches. It makes fine jelly. In the spring, the foliage is a rich maroon. Perfectly hardy, easy to grow, thriving in any soil.

Labeled by Tag

Price: 4 to 5 ft. trees, \$2.00 each

No. 12-6 MAGNOLIA GRANDIFLORA

Magnificent in its pyramidal growth. The glossy green leaves are beautiful and would warrant planting it without immense, waxy white, gold-centered flowers, which are abundantly produced through several months. An impressive and wholly desirable shade tree. Magnolias are easily grown with plenty of good leaf-mold. Plant before growth begins. Certainly these trees deserve a place on your grounds.

Price: 15 to 18 in., \$1.95 each

Price, postpaid: 2 to 3 ft., 80c each

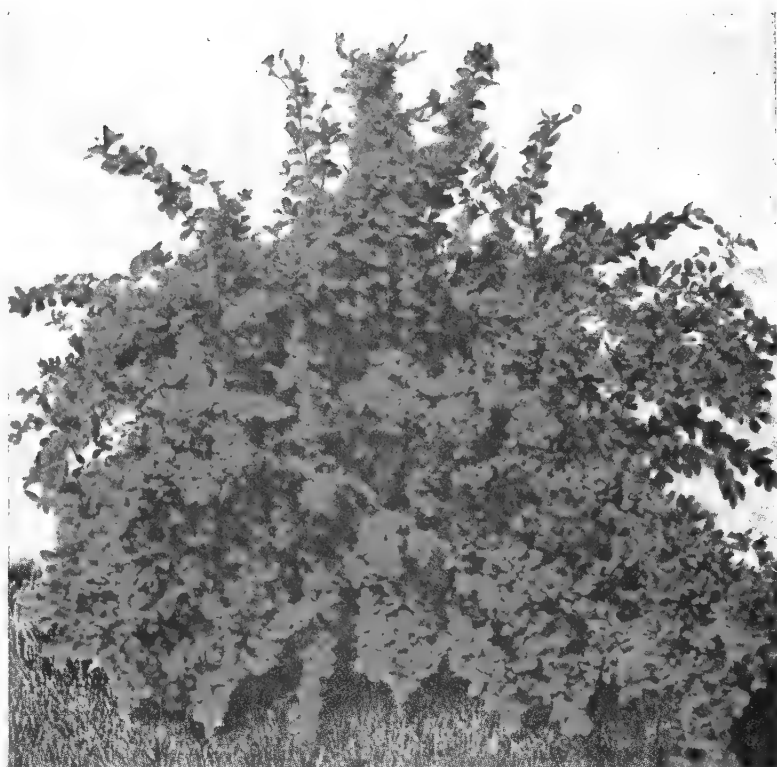

No. 16-12 FORSYTHIA (Golden Bell)

Rarely do we find a yellow flower that attains such perfection in glowing color as the early blooming flowers that mass in great profusion during April. After that, the graceful swaying limbs support dense green leaves that suggest a friendly welcome to the lawn or shady part of the landscape.

Price, postpaid: 2 to 3 ft. size, 70c each

SHRUBS: The exact size of the hole will, of course, depend on the size of the plant root system. Make sure that the roots are not crowded. Pack good top soil around the roots, watering them thoroughly. Then water only often enough to keep the soil moist. Do not keep the soil soaked. For detailed information on watering, refer to Roses or Pecans. The basic principles are the same.

WOLFE NURSERY

Red Leaf Barberry

No. 16-6 BARBERRY, RED LEAF

There is nothing as strikingly brilliant in hardy shrubbery as our genuine true red strain of Red Leaf Barberry. Its abundance of thick red-maroon leaves fairly glisten and makes a novel contrast to other plants. Grows about 3 or 4 feet tall. Plant for single specimens, corner groups, solid border hedge, etc. Beautiful in front of a light-colored home.

Price, prepaid: 12 to 15 in., 80c each

Gallon containers, \$1.45 each

Forsythia—Golden Bell

Bleeding Heart

No. 16-1 BLEEDING HEART

A favorite in Grandmother's garden half a century ago, it is equally popular today. Grows 2 feet tall. Thrives in partial shade, but will grow in full sun. Attractive foliage. Graceful heart-shaped pink flowers in April-May. The plant becomes larger, more beautiful, each passing year.

Price: 80c each, postpaid

Wolfe's Flowering Shrubs

More For Your Dollar

ALTHEA (Rose of Sharon)

Beautiful double flowering varieties of Red, Purple, Pink, and White that shower blooms from the middle of July to frost. Big, bright green leaves. These hardy, fast growing Altheas make one of the showiest of midsummer flowering shrubs.

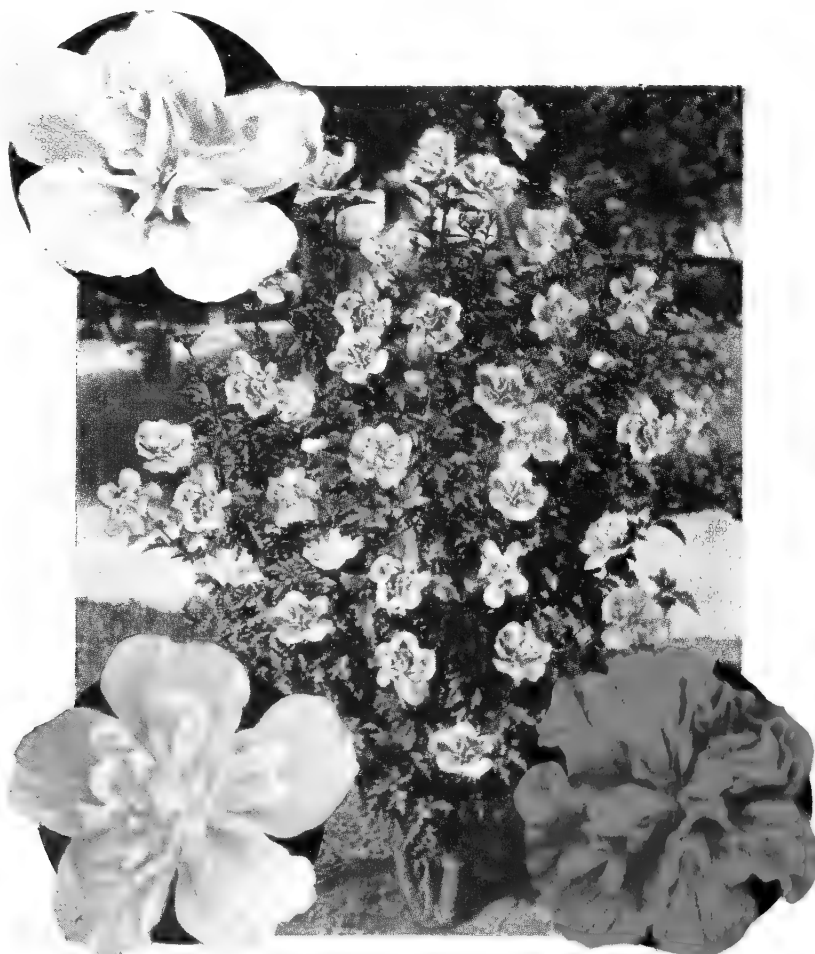

No. 16-2 RED	Price: 2 to 3 ft., 60c each
No. 16-3 WHITE	Price: 2 to 3 ft., 60c each
No. 16-4 PINK	Price: 2 to 3 ft., 60c each
No. 16-5 PURPLE	Price: 2 to 3 ft., 60c each

Postpaid

No. 16-10 CYDONIA JAPONICA

An aristocratic early blooming shrub that puts on showers of lovely salmon-red flowers in February or March, before the dark green leaves appear. This mass of red blossoms remains for 3 or 4 weeks. An extremely hardy shrub that is used in front of evergreen foundation plantings with striking results. A border of Cydonia is a breath-taking sight.

Price, prepaid: 1 to 2 ft. size, 80c each

Althea—Red, White, Pink, and Purple

Cydonia Japonica

AN ALL SEASON PARADE

No. 16-19 **WISTERIA, PURPLE**

A magnificent climber that becomes more beautiful each year. Can be trained to make a tree. Plant on trellis, fence, old trees or as special specimens. Will bloom first year.

Price, prepaid: 1-yr. size, 80c each

CRAPE MYRTLE

One of our most beautiful flowering shrubs. We are experimenting with several new promising varieties and will offer them just as soon as possible. The two colors that we list now are much improved over the old strains of Red and Pink. The blossom clusters are much larger and bloom from July to November.

POSTPAID

No. 16-8 **RED** **Price: 2 to 3 ft. size, 80c each**

No. 16-9 **PINK** **Price: 2 to 3 ft. size, 80c each**

No. 16-15 **MOCK ORANGE**

This beautiful flowering shrub blooms heaviest in May and June but Orange blossoms can be seen almost any day during the summer. It is Mother Nature's perfume of the garden.

Price, postpaid: 2 to 3 ft. size, 80c each

Wisteria, Purple

Crape Myrtle—Red and Pink

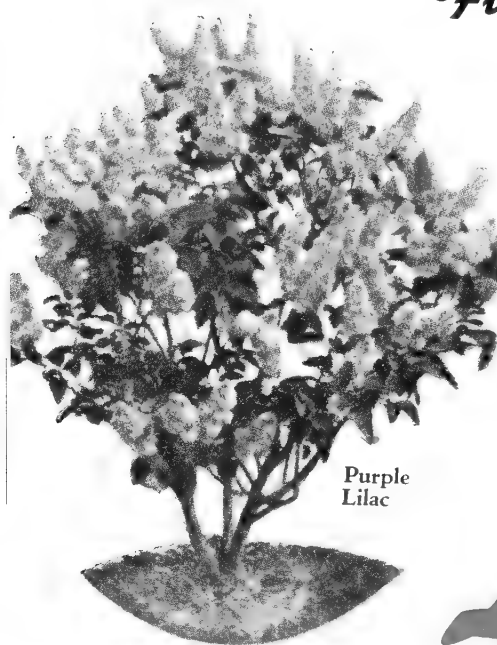

Mock Orange

Complete Your Landscape with *Flowering Shrubs*

No. 16-14 LILAC, PURPLE

The beautiful old purple Lilac that you and I have known since we were kids. I have the original pure strain that grows tall and is covered with huge blossoms that only Mother Nature can provide. Fragrant and is often used as an informal hedge or as a flowering shrub under high windows.

**Price, Prepaid: 1 to 2 ft. size,
80c each**

Lilacs *Modern Double French Hybrid*

No. 0-18

**Huge Fragrant Double Blooms Make Beautiful
Bouquets—A Complete Range of Exciting
Colors for Your Enjoyment**

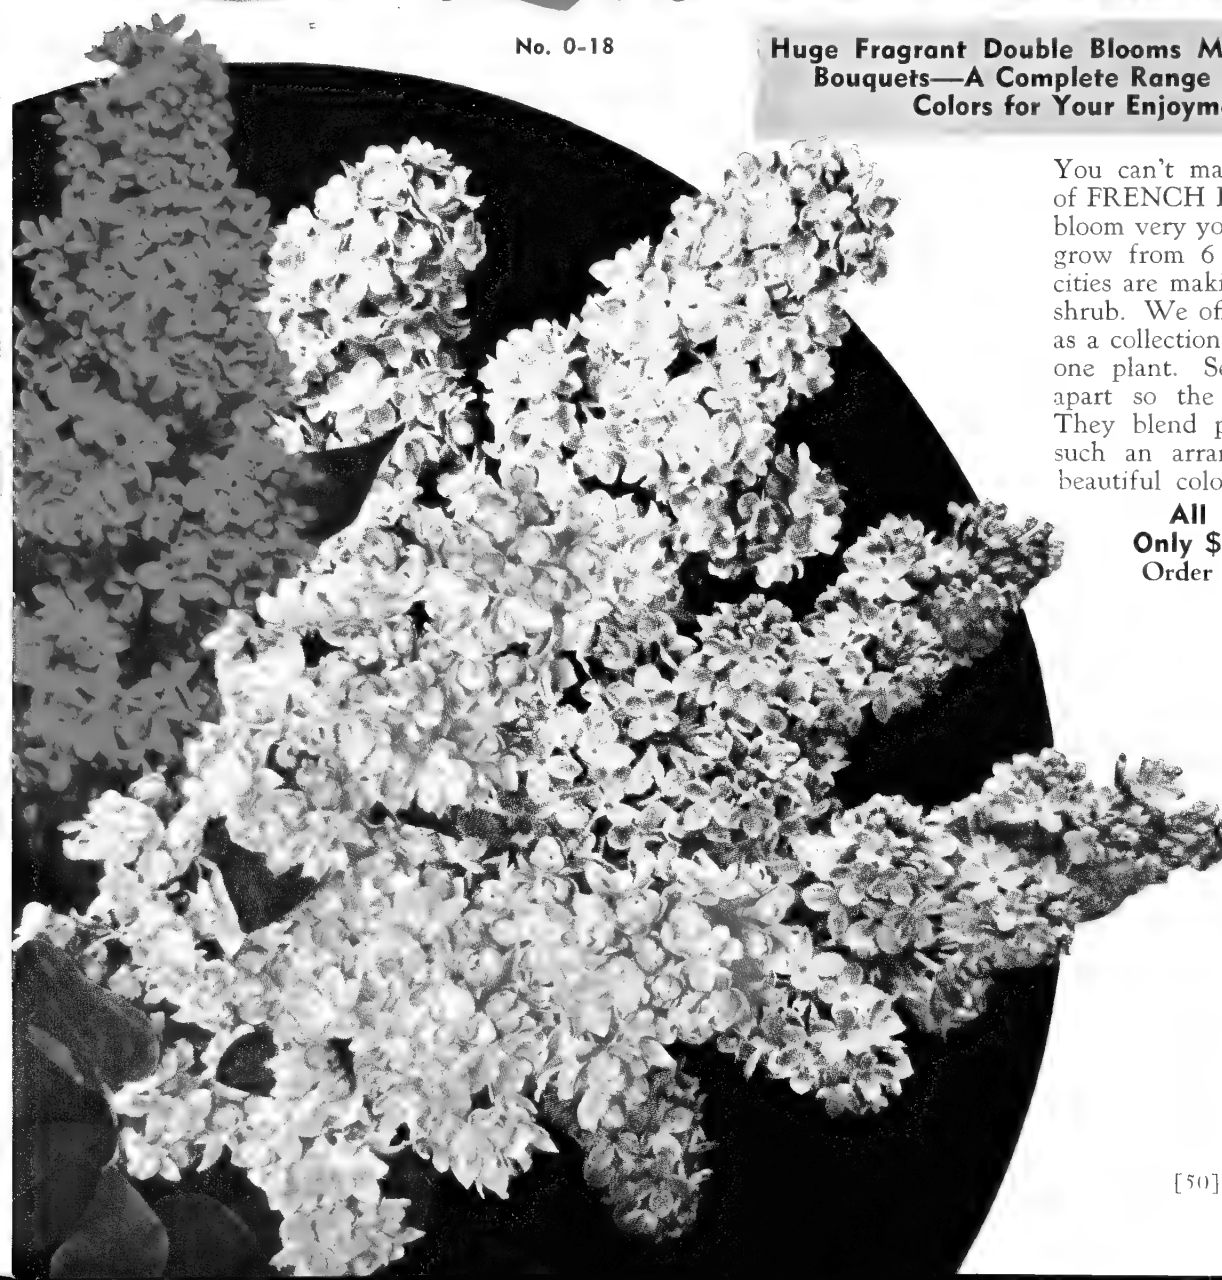

You can't match the exotic beauty of FRENCH HYBRID Lilacs. They bloom very young after planting and grow from 6 to 8 feet tall. Many cities are making them the city-wide shrub. We offer these four varieties as a collection at almost the price of one plant. Set them about 2 feet apart so the blooms will overlap. They blend perfectly together and such an arrangement will make a beautiful color scheme.

**All Four Colors
Only \$3.75, Postpaid
Order Offer No. 0-18**

No. 16-11 SNOWBALL, JAPONICA

There are few June-flowering shrubs which can match the rare beauty of the pure white flowers arranged in perfectly round "snowballs", 3 to 4 inches across. It's a stately, erect grower, dressed in beautiful rich green foliage. Makes a handsome 6- to 8-ft. specimen.

**Price: 18 to 24
inch, 90c each,
postpaid**

No. 16-17

Weigela

← Bristol Ruby

(Plant Patent No. 492)

A superior Weigela, producing immense quantities of sparkling, ruby-red, bell-shaped flowers. After the spectacular June to July display is past, another fine showing of bloom appears in late summer and autumn. Grows into a perfectly formed, well-rounded, 6- to 7-foot specimen.

**Price: \$1.50 each,
postpaid**

No. E-16 **GOLDFLAME** (Honeysuckle Family)

This new sensational Goldflame Honeysuckle blooms every month in the year and is an unusually heavy blooming variety. The beautiful red and rich golden yellow blooms make a dainty tassel for the shapely bush. Shade or sun.

Price, Prepaid: 1 to 2 ft. size, 90c each

No. 16-16 **PINK ALMOND**

This lovely pink blossom shrub with creamy white tassels forming a dainty center of the flower lends an unusual beauty to any landscape. It is adapted to almost any section and is deserving of its popularity as an early blooming specimen. Mix plenty of flowering shrubs of different colors in with a well arranged evergreen foundation planting and your landscape will be a thing of beauty.

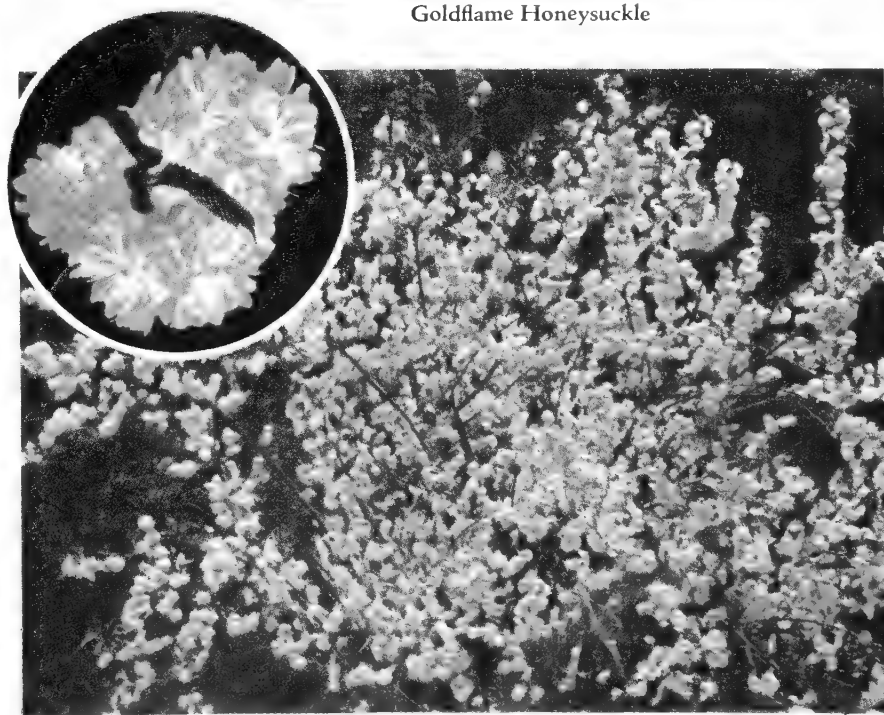

Price, prepaid: 1 to 2 ft. size, 80c each

Goldflame Honeysuckle

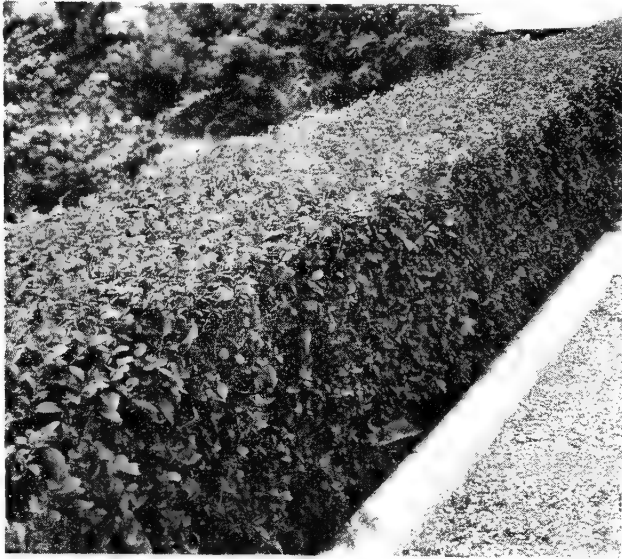

Snowball, Japonica

Pink Flowering Almond

Plant **HEDGES** for a friendly evergreen fence

In addition to being a beautiful, friendly, evergreen fence, hedges play an important part in climate control around your home. Arranged with shade trees and evergreens, hedges can reduce temperature in the summer and block cold, frosty winds in the winter. Hedge will also stop low-blowing dust and litter from entering into your lawn and flower beds. Our hedge varieties may be pruned for formal hedging or grown tall as an informal hedge.

No. 17-2 JAP LIGUSTRUM

The very best for an evergreen hedge. The big, dark green, showy leaves and compact growth make it easy to trim and shape. Makes a fine informal hedge when not trimmed. Fast growing variety.

**Prices, Prepaid: 1 to 2 ft. size, 10 for \$2.50;
20 for \$4.50; 50 for \$10.00**

No. 17-1 AMOOR RIVER PRIVET

Most widely planted hedge in the South. Beautiful for a low or tall sheared evergreen fence. Prune any time, shape it any way you desire, round, square or in figures.

**Prices, Prepaid: 2 to 3 ft., branched,
10 for \$1.50**

Mrs. Ross Wolfe's
GIANT DAHLIAS

Here is the most exciting collection of the Giant Size Dahlias you have ever seen. Each variety will produce lovely blossoms, measuring from 10 inches to 1 foot in diameter.

COMMANDO

A giant lavender-blue, almost identical in color with Blue Rover.

COMMODORE

Very large blooms of a little deeper yellow than California Idol.

CLARA CARDER

Huge decorative, unusual shade of Cyclamen-pink. No other color just like it.

MRS. GEORGE LeBOUTILLIER

Best of the carmine-red Giant Dahlias. Can be grown to 12 inches easily.

WHITE WONDER

Jumbo pure white with long curling petals. Flowers up to 10 inches across.

← CARNATIONS

Hardy Carnations are becoming popular because they are not only lovely in the garden but are fine for cutting. The flowers are very fragrant and come on long stems. Grow 18 to 20 inches tall and bloom all summer. We offer a collection of 3 colors that will bloom this year.

ALL 3 Carnations \$1.00
Order Offer No. 0-14 **Postpaid**

Columbine brings to your garden or a bouquet, a "fairy" touch that no other flower can give. The colors are so rich, so clear, so exquisitely lovely and they blend perfectly. The flowers are much larger than pictured, up to 3 inches across, with spurs 4 to 5 inches long. Come up year after year, grow 2 to 3 feet tall and bloom so generously in the spring. Thrive in ordinary soil and prefer partial shade, especially from afternoon sun. Our plants will bloom this season.

Hardy Perennials Complete the Landscape

HARDY GARDEN Lilies

B-65 Rubrum. Considered by many to be the loveliest of all. Blooms from late July into September. The flowers are bright pink edged white with small maroon spots. Strong stems 3 to 4 feet tall. Perfectly hardy. Plant in well-drained soil about 8 in. deep, in full sun or part shade. Will bloom this summer.

Regale. One of the most popular. Large trumpet-shaped flowers, white with yellowish blush at base of each petal. Blooms June and July on 3- to 5-ft. stems.

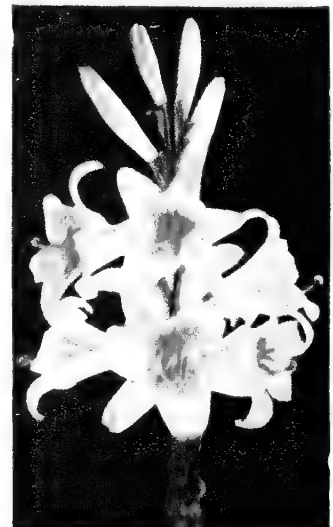

Philippine. Often called the "Hardy Easter Lily." Long trumpet-shaped, fragrant, white flowers; touch of green inside throat. Blooms July and August. Three to four feet tall.

Cushion

Mums

Will be shipped separately from the rest of your order and at the proper time for planting.

Remember: Cut your Mums back to two inches above the ground when planting.

Cushion Mums

Grow about 2 feet tall and 2 feet wide. A RIOT of colors and entrancing beauty in the fall. The most show for your money!

Thousands of lovely, colorful Mums to brighten your home from early fall until frost. Decorate vacant spots, borders, or a special garden with all five colors and have bushels of gorgeous blossoms the first year. They make a lovely deep green globe during the summer and all the blossoms seem to pop out over night. Cushion Mums will be shipped separately from the rest of your order—

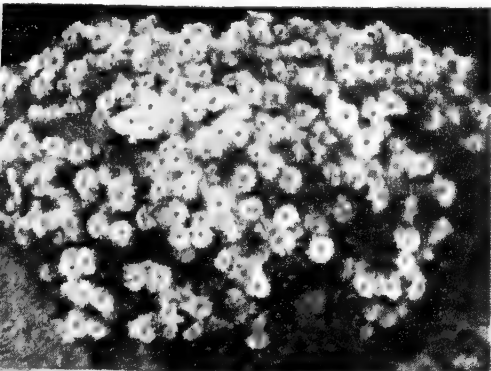

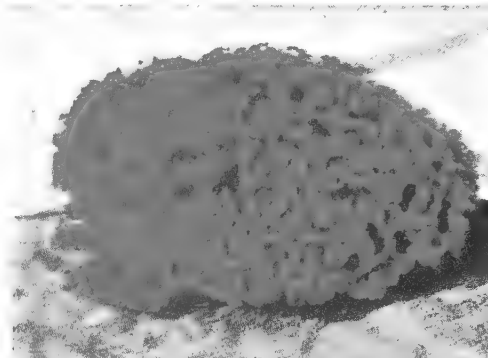

usually around the latter part of April and first part of May. When your Mums arrive, plant them right away. IMPORTANT: Cut all the top off about 2 inches above the ground. This causes the plant to spread and make better growth. Soak the ground when planting and keep moist and shady for several days.

A NEW LANDSCAPE SERVICE

Due to DEMAND, we now offer a complete line of evergreens in Balled and Burlapped stock, gallon containers, and low cost Evergreens ROOT-WRAPPED in Sphagnum Moss. Our Balled and Burlapped (B & B) evergreens are priced so low that customers can pay the freight for long distances and still save money. Each one is a SPECIMEN PLANT and is shipped in a special safety cardboard carton ready to plant. Gallon containers are also shipped in special safety cartons. We pay postage on Root-Wrapped Evergreens but you pay Express or Motor Freight charges on B & B and gallon containers. Since shipping distances vary so much, we felt it necessary to ship charges collect. Remember—we send extra stock to offset your cost of shipping. **Note:** gallon containers are only shipped in multiples of 2 or 4. Please order two or more. Due to handling costs, we don't like to ship orders amounting to less than \$3.00.

No. E-8 ITALIAN CYPRESS

A tall, graceful, slender Evergreen with dark green foliage. Need not be sheared—grows 20 feet tall, but can be kept to desired height by pruning top. Use with Pfitzer Junipers to build up tall lines on the corners of your home.

Price, Prepaid: 1 to 2 ft. size, 90c each
Root Wrapped

Gallon containers \$1.75 each
B & B specimens 2.75 each

No. E-5

QUEEN'S WREATH

A lovely slender vine that produces racemes of dainty, pink flowers in a grape-like cluster. Blooms from mid-summer until late frost.

Price, Prepaid:
2-yr. vines, 80c each

No. E-7

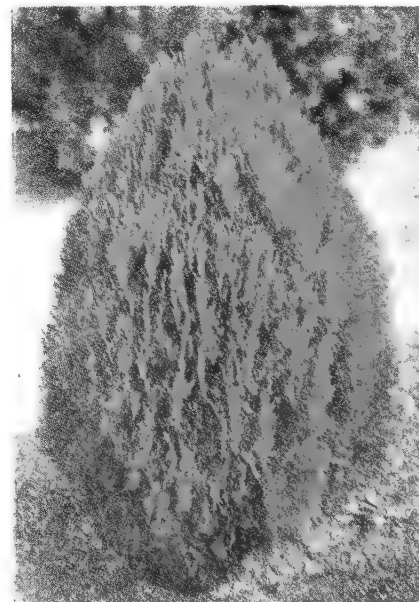

BERCKMANN'S GOLDEN ARBOR-VITAE

A dwarfish, compact, globular Arbor-Vitae with light green foliage, tipped with bright gold in spring. Grows 6 feet tall. Use as a background for unusual "color scheme."

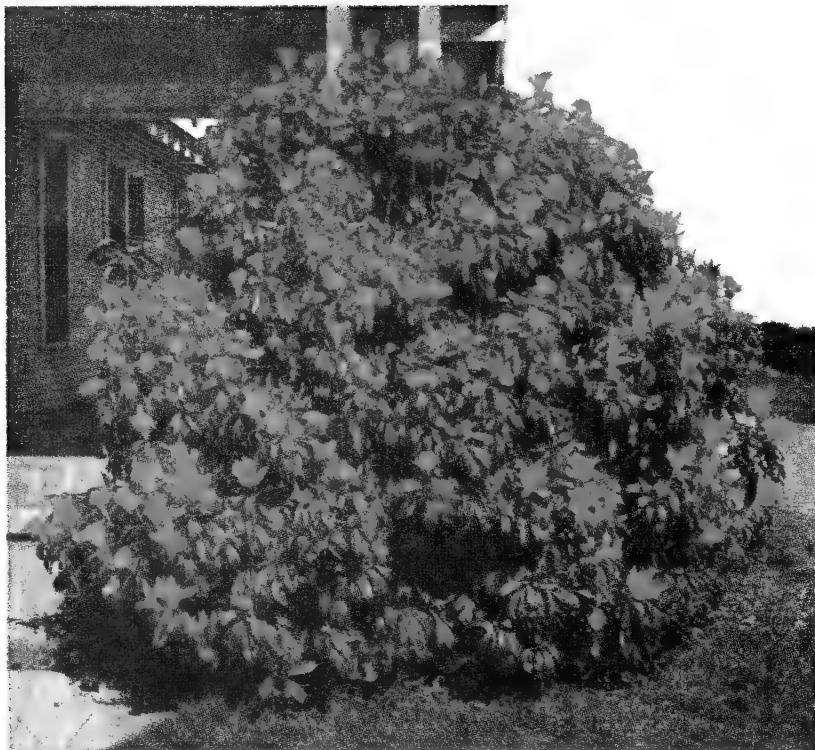

Price, Prepaid: 1 to 2 ft. size,
\$1.00—root wrapped
B & B specimens, \$2.95 each

Tall Graceful Italian Cypress

Berckmann's Golden
Beautiful Contrast

No. E-3 PHOTINIA

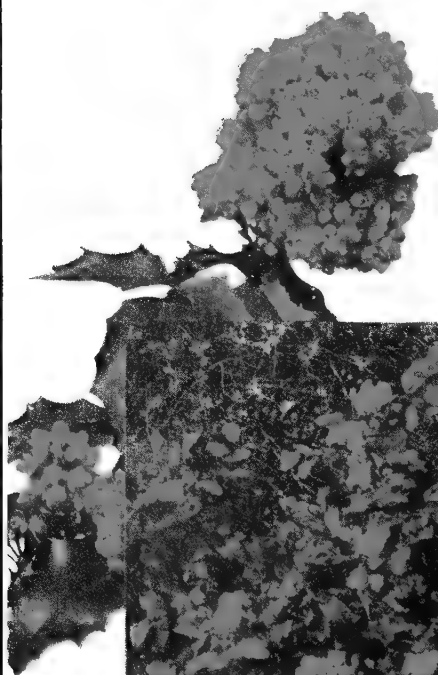

A large handsome Evergreen with slightly curled, indented leaves. The new foliage in the spring is a contrast of bright colors and in the fall, they produce an abundance of scarlet red seed pods that look like a mass of red berries. Thrifty grower that can be used many places in the landscape. Will grow from 5 to 7 feet tall but can be pruned low.

Prices: 1 to 2 ft., Root Wrapped, 90c each
Gallon Containers, \$1.45 each; B & B Specimens, \$2.95 each

**No. E-23—MAHONIA
 AQUIFOLIUM**

"Dwarf Oregon Grape." Dark, lustrous, Holly-like foliage and yellow flowers, borne in dense clusters in the early spring. The flowers are followed by small purplish berries. For a dense, compact, low bank of foliage, it is almost unexcelled. Grows easily anywhere, best in half-shade with plenty of moisture.

Root-Wrapped, 9 to 12 in., \$1.00
B & B Specimens, \$3.25

Mahonia—Oregon Grape Holly

No. E-17 CEDRUS DEODARA

Handsome Deodara from the Himalaya Mountains is well known as the outdoor Christmas Tree. The frosty, blue-green foliage and cone shape make a beautiful specimen. Grows 15 to 20 ft. tall.

Prices: Gallon Containers Only, \$1.95 each

No. E-11 WAX LEAF LIGUSTRUM

One of the finest broad-leaf Evergreens grown in the South. This aristocrat of the Evergreen family has showy, thick, waxy leaves that are dark green on top and light green on the under side. Can be pruned to any shape, for specimen plants, or beautiful informal hedge.

Price, Prepaid: 1 to 2 ft. size, 90c each—
Root Wrapped

Gallon Containers, \$1.45 each
B & B Specimens, 2.45 each

Black Wax—Ligustrum

No. E-18 BURFORDI HOLLY

"Burford Holly." The finest Holly because the foliage is large and glossy, deep green in color. The plants bear plenty of big, bright red berries like those illustrated above. It will make a big shrub in time, but not for many years will it reach ultimate height. Will grow well in either sun or shade. 6 to 10 ft. 10°.

Price: Gallon containers, \$1.95 each

No. E-19 ARIZONA CYPRESS

Very popular in the Southwest. A beautiful tree that grows to 25 feet. Blue-gray foliage. Natural growth is spreading but can be kept slender by shearing. The ARIZONA is hard to transplant, but once started is hardy and drought resistant. Do not water this plant as much as other Evergreens.

Price: Gal. cans, \$1.95 each

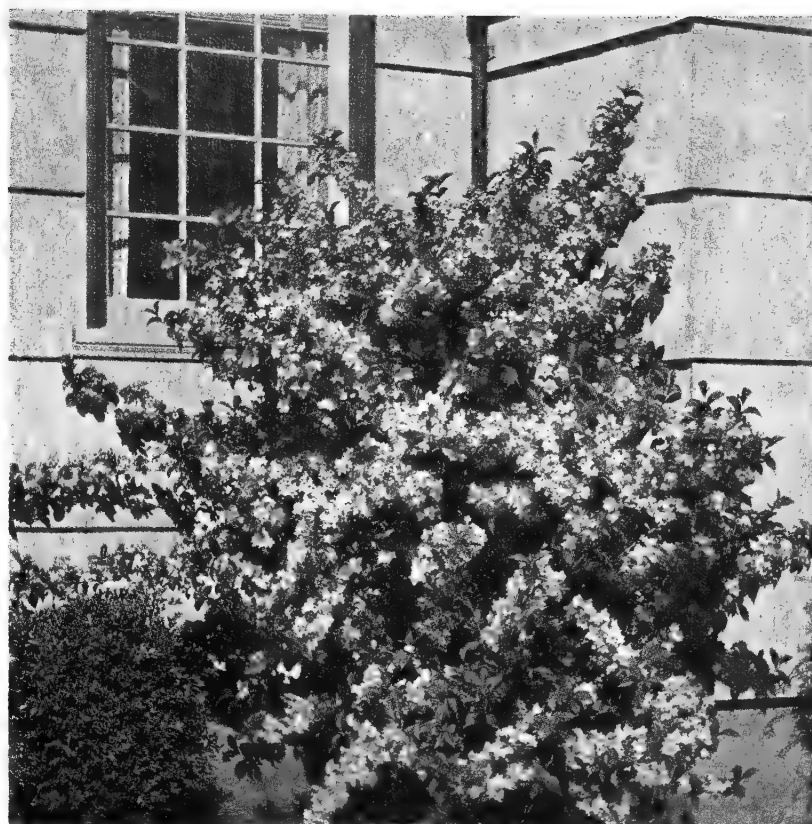

No. E-10 BONITA ARBOR-VITAE

Bonita is a dwarf medium Evergreen that grows round as a ball. No trimming necessary. Grows 3 to 4 feet tall and just as broad.

**Price, Prepaid: 12 to 15 in. size, \$1.00 each
B & B specimens, \$2.75 each**

Bonita Arbor-Vitae

No. E-15 ABELIA

One of the rare evergreen family that blooms from May until frost with a mass of fragrant, white flowers that have a very light touch of pink. Each flower is cradled in a bell-shaped cup with six petals of dark purplish red. This array of exquisite blooms has for a background a willowy, dense, glossy green foliage that changes here with the season. Grows 3 or 4 feet high.

Price, Prepaid: 1 to 2 ft. size, 80c each—Root Wrapped

Gallon containers \$1.45 each

B & B specimens 2.75 each

Arizona Cypress—The above picture is not an Arizona but resembles it very closely—a wonderful background

Gardenia

Fortunei

Compare our Prices!

No. E-12 GARDENIA FORTUNEI

This hardy, sweet scented Evergreen needs no description. As shown at left, this is a heavy blooming variety that will bloom the first year if planted early. Like every item in our catalog, Gardenia Fortunei has proven worthy of a place in your planting. Shade or sun. Cover if temperature drops below zero.

**Price, Prepaid: Heavy, well rooted specimens,
1 to 2 ft., 80c each—root wrapped
B & B specimens, \$1.95 each**

No. E-9 PFITZER JUNIPER

Most handsome and useful Evergreen for the landscape. This popular spreading Juniper has beautiful silver-green, weeping branches and works in nicely with Italian Cypress, Bonita, or as a fill for borders and walk planting. Reaches a spread of 4 to 6 feet and can be pruned to desired shape.

**Price, Prepaid: 9 to 12 in. plants, \$1.00 each
B & B specimens, \$2.95 each**

Pfitzer Juniper—Low Spreading

No. E-6 BAKER'S PYRAMIDAL ARBOR-VITAE

A beautiful dark Evergreen that will furnish a special green for your foundation planting. Can be sheared, will grow from 8 to 12 feet tall.

**Price, Prepaid: 1 to 2 ft. size, 90c each
B & B specimens, \$2.95 each**

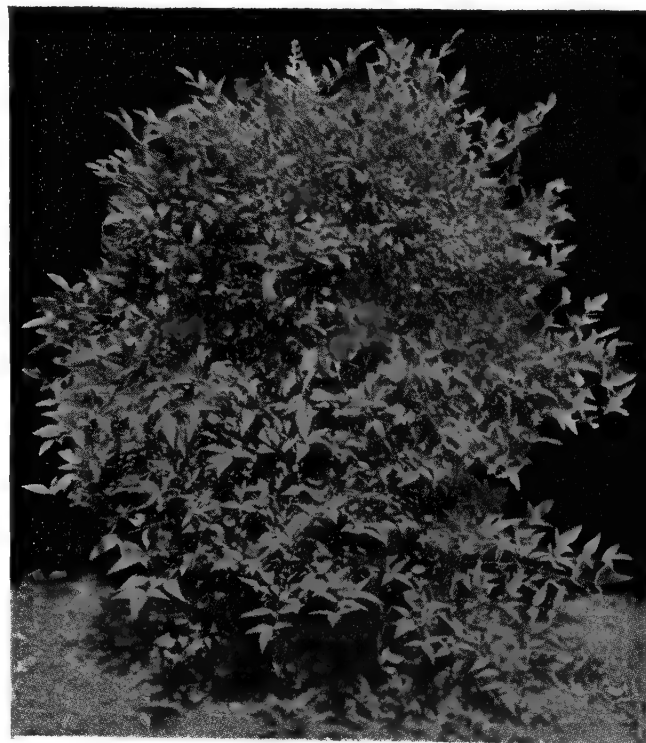

No. E-2 NANDINA

The unusual Evergreen that changes color with the season. Bright green in the summer, turning to vivid shades of fire-red in the winter. Covered with clusters of scarlet-red berries all winter. Grows 3 to 5 feet tall. Can be pruned to desired height. Use under windows and mix with other greens for year round beauty.

**Prices, prepaid: 1 to 2 ft. size, 90c each
Gallon containers \$1.45 each
B & B specimens 2.95 each**

Baker's Pyramidal

Nandina—Most Beautiful Plant in the Landscape
Plant Several

Compare our Quality!

No. E-21 CHERRY LAUREL

A handsome Evergreen shrub that can be grown into a tree or pruned as a specimen. Dark, shiny green leaves and grows very compact. Prune the lower limbs if you want it to grow tall. Will grow 15 to 20 ft. tall.

Prices: Gallon containers, Only \$1.90 each

No. E-4 YELLOW JASMINE

We have selected this variety out of several Jasmines. Its long, slender branches arch and hang to the ground. The foliage is a bright, tender green that is covered with gorgeous little yellow flowers all summer.

Price, Prepaid: 1 to 2 ft., 80c each—Root Wrapped B & B specimens, \$2.25 each

No. E-1 EUONYMUS JAPONICA

A waxy, glossy leaved specimen of the Broad-Leaf Evergreen family. An all-purpose plant that may be pruned to any shape, or that will cling close to the wall. Ideal for planting behind flowering shrubs and will make a lovely hedge.

Price, Prepaid: 1 to 2 ft. size, 75c each—Root Wrapped Gallon containers, \$1.35; B & B specimens, \$1.95 each

No. E-25 IVY, ENGLISH (Evergreen)

Ugly bareness becomes a spot of beauty when buildings of stone, concrete or stucco, and "hard-to-cover" slopes and banks are covered with the dense, rich, glossy evergreen foliage of English Ivy. Famous for long life. Mass effect can be created by planting 2 to 3 feet apart.

Price: 2 yr., 90c each, Prepaid

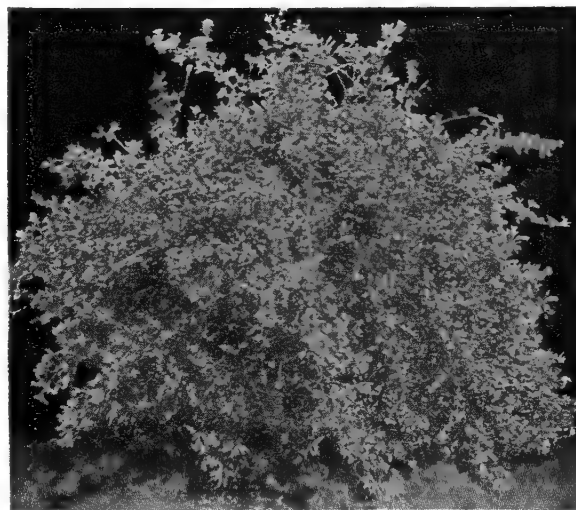

No. E-22 BLUE GLOBE

A beautiful dark green upright Bonita that grows cone shaped. Will grow about 5 or 6 ft. tall and makes a wonderful corner specimen plant.

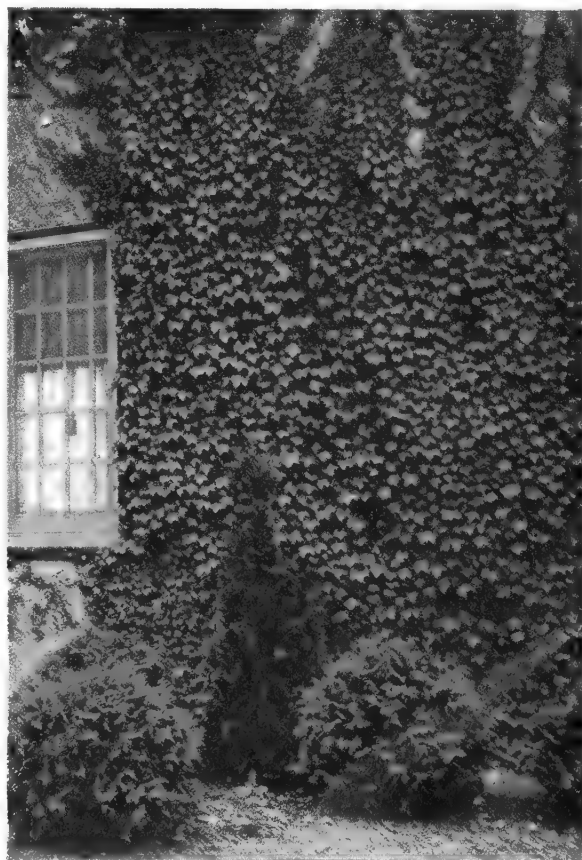

Prices: B & B specimen, Only \$2.95 each

CULTURE

Evergreens: Plants received with a burlapped ball of earth on the roots should be planted at once. Dig the hole large enough to have a 6- to 12-inch clearance all around the ball of soil. Also, dig the hole 1 to 2 inches deeper than the burlapped ball is high. Do not increase the chances of breaking the ball of soil by cutting the burlap loose at the top. The burlap will decay in approximately 2 weeks. Pack only fertile top soil around the root system. Water the plant thoroughly. After the water has soaked in, finish filling the hole with good soil to within 1 inch of the ground level. Treat Evergreens received bare-rooted the same as bare-rooted trees. Be sure to remove the waterproof paper from around the roots. This will enable you to spread out the roots and the plant will grow off much faster.

Yellow Jasmine

English Ivy to Cover Those Bare Ugly Spots

Euonymus Japonica will Cling or Stand Alone

Blue Globe—An Upright Bonita

Colorful Evergreens for year-round Beauty

No. E-14 LALANDI PYRACANTHA

Commonly called Firethorn. Tall, upright Evergreens covered with bright orange berries during the winter months. Leaves are dark, shiny green. Endures extreme cold.

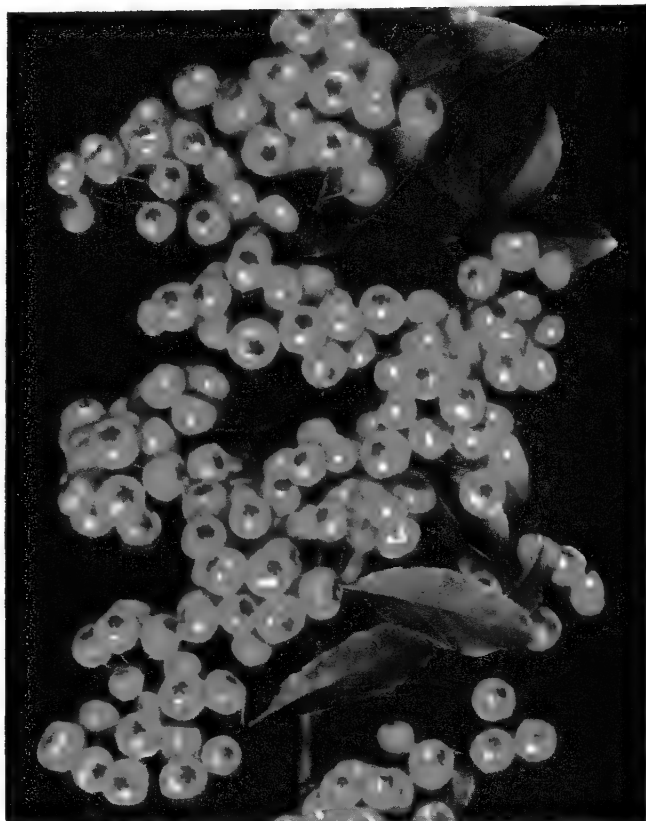

Price, Prepaid: 1 to 2 ft., 90c each—Root Wrapped only

No. E-13 CRIMSON TIDE PYRACANTHA

A new hardy Pyracantha that is a sensational beauty. A dwarf compared to Lalandi and produces a solid mass of larger, rose-red berries all through the winter season. It has a darker, broader, bright green leaf than most Pyracanthas. Perfect for specimen planting or informal hedge.

Price, Prepaid: 1 to 2 ft., \$1.00 each—Root Wrapped only

THE GOVERNMENT OF THE UNITED STATES OF AMERICA
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
WASHINGTON, D. C.
OFFICE OF THE ASSISTANT SECRETARY
LAND ACQUISITION SECTION
WASHINGTON, D. C.

TO THE SECRETARY OF THE INTERIOR
FROM THE ASSISTANT SECRETARY
SUBJECT: LAND ACQUISITION

RE: LAND ACQUISITION

1. The following is a list of the lands which are being acquired by the Government for the purpose of establishing a national monument.

2. The total area of the lands being acquired is approximately 10,000 acres.

3. The lands are located in the State of California.

WE SHIP EXPRESS — PARCEL POST — MOTOR FREIGHT

Please note that some items in our catalog are DELIVERED TO YOU, POSTPAID. Our fruit trees, Pecans, Walnuts, and shade trees are too large to be shipped by parcel post and are shipped **express or motor freight collect**. You pay the charges when the shipment is delivered.

In some orders, there are trees which must go by express and also some stock which would go parcel post. In order to avoid making two separate shipments, we send the entire order by express. For this privilege, we give **FREE NURSERY STOCK** which has a greater value than the additional express charge.

FREE NURSERY STOCK

Order early and get valuable free nursery stock. On orders amounting to \$10.00 to \$20.00, you may select \$1.00 worth of additional stock. Just check the item on the order blank and mark **FREE** in place of the price. You may select \$1.00 worth for each ten dollars (\$10.00) worth. This will pay the express charges on your shipment. We appreciate your orders and want to show our appreciation.

How to Order

Use our simplified order sheet. The name of everything in this catalog is listed on the order sheet as follows—name, color, label, size, price each—all you have to write is the quantity and total price. Carry the total of each column to Special Offers where you write **TOTAL**. Use our self-addressed return envelope—it saves time in handling your order. If we are unable to ship all your order when it is received, the items left out will be marked **S. L.**, which means that it will be **SHIPPED LATER**.

True-to-Name Stock

Now, more than ever, you can depend on Wolfe Nursery for pure-strain, true-to-label varieties. We bud from our own proven bearing orchards—double-label the buds as they go to the nursery fields—and double-label each variety in the field with metal and paint labels. Before the trees are dug and handled, each one is labeled with one or more color paint stripes about 6 or 8 inches from the ground. Only seven colors are used to label all our stock—**RED, WHITE, BLUE, GREEN, YELLOW, PINK and ORANGE**. Notice—we have first letter of color labels after the name varieties listed on the enclosed simplified order sheet. For example: Holland Apple—O-R—the O-R means that Holland is labeled **ORANGE** over **RED**. Frank Peach—W—Frank is labeled with one **WHITE** stripe. Your original order sheet will be returned in a waterproof envelope attached to the bundle of nursery stock. Use it or the catalog to identify each variety.

Money-Back Guarantee

Our guarantee is simple. First, you must be completely satisfied when our stock reaches you. If it does not reach you in perfect condition, it still belongs to Wolfe Nursery and costs you nothing. If the stock reaches you in live, growing condition, then, you are responsible for the care. Any request for adjustment must be made within 10 days after delivery. Our trees are true-to-label. Double your money back if not. Keep your original order. Stay with Wolfe for pure-strain, true-to-label stock that bears young.

Federal and State Approved Nursery Stock

Our nursery stock is carefully inspected twice by both Federal and State inspectors before being certified. In addition to these four inspections, we inspect when digging, as it is graded, as it goes through the processing department and when your order is filled. Your trees will have been inspected at least seven or eight times before they are shipped. When you buy from Wolfe Nursery, you get stock that is free of disease and graded by American Nursery Standards. Caliper shall govern. Grading by height represents average of most varieties. Heavy caliper trees are most desirable.

Tell Your Neighbor

Our best salesmen are satisfied customers. If you like our stock, please tell your friends or neighbors. We print only a small quantity of catalogs and will greatly appreciate your lending or giving your copy to someone needing good nursery stock. We will make it up to you with extra service. Thanks!

PLEASE DON'T ASK US TO SHIP BEFORE STOCK IS DORMANT

Every year some of our good customers ask us to ship in September, October, and November. Yes! we'd like very much to ship that early but the stock **IS NOT RIPE—IT IS NOT DORMANT—IT WON'T LIVE** or do its best. We must wait for frost to cure the plants. We can't take your money and then ship stock that we know has been dug green. We open our sales

room in September with Balled and Burlapped Specimen Plants, but they can be dug—cured, and handled safely. Our shipping season (depending upon the weather) usually starts around **DECEMBER 15th**—so, **PLEASE**, please don't rush the planting date. You'll be ahead in the long run, and we'll have one more satisfied customer.

WOLFE NURSERY

New Superior Phlox

A favorite and one of the most widely used border plants. They produce a wealth of blooms for a long season and come up year after year. Can be divided year after year. All perennials are shipped separate from the rest of your order and at the proper time for planting. Order Special Phlox Offer below. At such a low price you may want to order several collections.

SHIPPING NOTICE

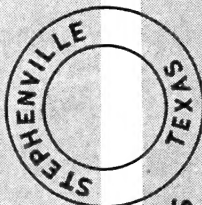

All perennials, such as Phlox, Cushion Mums, Columbine, Carnations, etc., are shipped after danger of spring frost in your area. Please order early so that your shipment may be scheduled for prompt delivery after danger of frost is over.
